Work by Prof. Oppenheim and his collaborators is summarized here.
During the period of April 1, 1990, through March 31, 1991, our research activities focused on continuing work on symbolic signal processing, new algorithms for signal analysis, and new signal representations based on wavelet analysis.

Our work on this contract during the past year has been reported in detail in the technical literature through technical reports, conference proceedings, and journal articles. Copies of these reports have been provided to the contract monitor and other offices as specified in the contract. Additional copies are available on request.

Sincerely yours,

[Signature]

Re: Contract No. N00014-89-J-1489

Type of Material: Annual Technical Report
Title: Numerical & Symbolic Signal Representation & Processing
Submitted by: Prof. Alan Oppenheim
Period covering: April 1, 1990 - March 31, 1991
Number of Copies: Three plus form 298
Distribution: Navy Distribution List (9)
