Approved by ANSI Std. 298-89
298-107
REPORT ON STRATEGIC DIRECTIONS IN COMPUTING RESEARCH PROJECT

Peter Wegner, Brown University
February 1997

This project involved an in-depth examination of strategic directions of computing research through the organization of a conference held at MIT in June 1996 and a report on that conference in Computing Surveys of December 1996 (Volume 28, No. 4). The project grew in scale from the initially planned meeting of about 100 people in five areas to a meeting of 300 leading researchers in 22 areas. The report likewise grew in scale and comprised over 300 hard-copy pages of the December issue of Surveys with an electronic supplement of over 600 pages including position statements. The Table of Contents of the Surveys issue is given below and a draft of the Table of Contents for the electronic supplement (Computing Surveys Volume 28, No. 4es) is attached. The electronic supplement is available through http://www.acm.org/surveys. We would be happy to send complimentary copies of the hard-copy Computing Surveys to individuals selected by you.
ACM 50th-Anniversary Issue, December 1996
Strategic Directions in Computing Research

Foundations

Strategic Directions in Theory of Computation, Michael Loui et al.
Strategic Directions in Computational Geometry, Roberto Tamassia et al.
Strategic Directions in Concurrency Research, Ranee Cleaveland, Scott Smolka et al.
Strategic Directions in Formal Methods, Edmund M. Clarke, Jeannette M. Wing et al.
Strategic Directions in Programming Languages, Chris Hankin, Hanne Riis Nielson, Jens Palsberg et al.
Strategic Directions in Artificial Intelligence, Jon Doyle, Thomas Dean et al.

Systems

Strategic Directions in Computer Architecture, Trevor Mudge et al.
Strategic Directions in Networks and Telecommunications, David Clark, Joseph Pasquale et al.
Strategic Directions in Object-Oriented Programming, Rachid Guerraoui et al.
Strategic Directions in Constraint Programming, Pascal Van Hentenryck, Vijay Saraswat et al.
Strategic Directions in Software Engineering and Programming Languages, Carl Gunter, John Mitchell, David Notkin et al.
Strategic Directions in Software Quality, Leon Osterweil et al.
Strategic Directions in Real-Time and Embedded Systems, John A. Stankovic et al.
Strategic Directions in Database Systems — Breaking Out of the Box, Avi Silberschatz, Stanley Zdonik et al.
Strategic Directions in Storage I/O Issues in Large-Scale Computing, Garth A. Gibson, Jeffrey Scott Vitter, John Wilkes et al.

Applications and Infrastructure

Strategic Directions in Human-Computer Interaction, Brad Myers, Jim Hollan, Isabel Cruz et al.
Strategic Directions in Computational Science and Engineering, Ahmed Sameh et al.
Strategic Directions in Electronic Commerce and Digital Libraries: Toward a Digital Agora, Nabil Adam, Yelena Yesha et al.
Strategic Directions in Computer Science Education, Allen B. Tucker et al.
Each entry indicates the author or authors, the title, and an abbreviated URL (for the full URL, prefix http://www.acm.org/surveys/1996). The abbreviated URL is a composite of the author's name and the area of the position statement.
