13. ABSTRACT (Maximum 200 words)
The U.S. Army Environmental Center tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting the Army in complying with the Native American Graves Protection and Repatriation Act (NAGPRA), P.L. 101-601. The MCX was asked to locate and assess archaeological collections derived from Army lands, to identify the Native American or Native Hawaiian organizations culturally affiliated with the collections, and to draft Section 6 summary letters for each installation. A two-stage process was used to identify, locate and assess the contents of the collections, consisting of archival research and telephone interviews with the repository personnel. This report conveys the results of the collection research completed for the compliance with Section 6 of NAGPRA.

St. Louis District,
Mandatory Center of Expertise for the
Curation and Management of Archaeological Collections,
U.S. Army NAGPRA Compliance Project,
Technical Report No. 25

September 1995
OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Louisiana Army Ammunition Plant in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections.

Archival research for Louisiana Army Ammunition Plant began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Louisiana State Historic Preservation Office (SHPO) in Baton Rouge, Louisiana. The records search was performed at the SHPO in December 1994 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. Draft Section 6 summary letters are enclosed for each of these tribes (Appendix I), as well as a listing of the current tribal chairperson (Appendix II).
RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT THE LOUISIANA ARMY AMMUNITION PLANT

Archaeological work on the Louisiana Army Ammunition Plant was conducted primarily in 1983. Several major firms performed archaeological investigations, which included collecting artifacts. These firms are:

- Archaeological Assessments, Inc., Nashville, Arkansas
- Coastal Environments, Baton Rouge, Louisiana
- Geo-Marine, Plano, Texas, and
- Prewitt and Associates, Austin, Texas.

Investigations consisted of systematic surveys, test excavations, and excavations to mitigate adverse effects on sites where necessary for the installation's mission.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of 25 ft$^3$ of boxed archaeological materials and associated documentation has been identified for Louisiana Army Ammunition Plant. Artifacts recovered include prehistoric lithics, ceramics, vertebrate and invertebrate fauna, floral remains, flotation and soil samples, as well as historic materials. There is no mention of any human remains or funerary objects having been excavated or collected.

As of July 1995, the collections are curated in a single repository:

Northwest Louisiana State University 25 ft$^3$

The attached Summary of Current Locations of Archaeological Collections from Louisiana Army Ammunition Plant (Appendix III) provides detailed information about each collection derived as a result of archaeological investigations at the installation. A collection consists of all of the materials, artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations.
Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

NAGPRA Related Materials

MCX research identified no human remains, funerary objects, or sacred objects during its review of archaeological records, associated literature, and telephone interviews for the Louisiana Army Ammunition Plant. The final determination of sacred objects or objects of cultural patrimony (as defined by NAGPRA) may be established through consultation with federally recognized Native American tribes that meet the definition of culturally affiliated tribes and/or lineal descendants.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Three sets of references regarding archaeological work conducted on Louisiana Army Ammunition Plant are attached: Appendix IV contains the list of references reviewed by the MCX during its archival research; Appendix V is the list of references contained in the National Archeological Data Base (NADB); and Appendix VI provides the references cited in the literature but not available for review by the MCX.

NATIVE AMERICAN TRIBES ASSOCIATED WITH LOUISIANA ARMY AMMUNITION PLANT

No cultural affiliation was reported in the literature review for the installation. The area occupied by Louisiana Army Ammunition Plant was never adjudicated during the 1978 Indian Land Claims, however the tribes in closest proximity are the Caddo, Alabama Coushatta, and the Choctaw (U.S.G.S. 1988).

The Alabama Coushatta are related to the Coushatta currently living in Louisiana and as part of the Alabama-Quassarte tribal town in Oklahoma (Moore 1994:7).

In addition to these groups, Waldman (1988:242) and Hudson (1976:497) depict the Tunica-Biloxi as having been located aboriginally along the eastern border of Louisiana. Hudson (1988:497) also shows the Chitimacha in the extreme southern portion of the state.

According to Hampton (1994) the Caddo’s ancestral land included areas in western Louisiana, Arkansas, eastern Texas, and Oklahoma. Hodge (1912) indicates that some Caddo were settled along the lower Red River in Louisiana as early as the 1600s. Caddo also settled along the banks of the Sabine River in Louisiana (Hampton 1994).
Some Choctaw lived throughout what is now Mississippi, southwestern Alabama, and parts of Louisiana before their removal to Oklahoma in the 1880s (Swanton 1922).

The Alabama Coushatta, Coushatta, Alabama-Quassarte, Choctaw, Chitimacha, Tunica-Biloxi, and Caddo are the federally recognized tribes whose ancestors were aboriginally located in closest geographical proximity to the Louisiana Army Ammunition Plant.
P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans and with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are draft NAGPRA Section 6 summary letters (Appendix I) and a list of the tribal chairpersons from the federally recognized tribes which may be culturally affiliated with the collections (Appendix II).

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER
FOR LOUISIANA ARMY AMMUNITION PLANT, LOUISIANA

[Installation Header]

Mr. Roland Poncho, Chairperson
Alabama Coushatta Tribal Council
Route 3, Box 64
Livingston, Texas 77351

Dear Mr. Poncho:

I am writing to inform you of collections held by Louisiana Army Ammunition Plant that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Alabama Coushatta. Louisiana Army Ammunition Plant has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Louisiana Army Ammunition Plant is responsible for collections that include approximately 25 cubic feet housed at Northwest Louisiana State University. These archaeological collections were generated from surveys and/or excavations conducted from the 1980s to the present. The collections consist of prehistoric stone tools, ceramics, animal bones, invertebrate fauna, floral remains, soil samples, and historic materials such as ceramics, metal, and glass. Also included in the collection are all associated documentation such as field notes, photographs, and correspondence. No human remains and no associated funerary objects were identified in our review of the collection documentation.

We are notifying the Alabama Coushatta because some of these materials were found in or near the area thought to be part of the territory occupied or used aboriginally by the Coushatta. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC, title] for Louisiana Army Ammunition Plant, at [telephone number] regarding these issues.
To facilitate discussions between Louisiana Army Ammunition Plant and the Alabama Coushatta on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM LOUISIANA ARMY AMMUNITION PLANT, LOUISIANA

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>

APPENDIX IV

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

<table>
<thead>
<tr>
<th>FIELD</th>
<th>DATA ENTERED</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subject Property</td>
<td>Army Installation name</td>
</tr>
<tr>
<td>Last Name</td>
<td>Primary author's last name</td>
</tr>
<tr>
<td>First Name</td>
<td>Primary author's first name</td>
</tr>
<tr>
<td>Middle Initial</td>
<td>Primary author's middle initial</td>
</tr>
<tr>
<td>Secondary Authors</td>
<td>Names of secondary authors, or in instances where the author is a company rather than an individual, the company name is listed here</td>
</tr>
<tr>
<td>Title</td>
<td>Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.</td>
</tr>
<tr>
<td>Series</td>
<td>If the report is part of a publication series, the name and number are provided here.</td>
</tr>
<tr>
<td>Date</td>
<td>Date of publication or submission</td>
</tr>
<tr>
<td>Length</td>
<td>Report length in pages</td>
</tr>
<tr>
<td>Contract Number</td>
<td>Contract number and delivery order number, if applicable</td>
</tr>
</tbody>
</table>
The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

- **Sponsoring Agency**: Agency for which the report was prepared
- **Contractor**: The agent contracted to perform the work
- **Subcontractor**: The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.

APPENDIX VI

OTHER REFERENCES TO LOUISIANA ARMY AMMUNITION PLANT

Attempts were made to obtain copies of references that were cited in NADB, on the site records, or in other publications but were not available at the Louisiana State Historic Preservation Office. From telephone conversations with various persons conversant with the archaeology of Louisiana Army Ammunition Plant, the MCX determined that no new collections are reported in these references.
