ALGL
Advanced Lightweight Grenade Launcher
PROGRAM OBJECTIVES

• United States Special Operations Command (SOCOM)
  – Field Improved 40mm Weapon System Meeting Special Operations Forces (SOF) Requirements

• Foreign Comparative Test (FCT)
  – Type Classify / Type Qualify Air-bursting Ammunition
ALGL

Key Performance Parameters

– Low System Weight
– Maximum Effective Range
– High Probability of Hit
– Ground and Vehicle Mounted
– Fire Control Provides Ballistic Solution
– Enhanced Target Detection and Recognition
– Uses Standard and Air-Burst Ammunition
7.62 Lightweight Machinegun
The current 7.62mm machine gun within the NSW inventory (MK43) has proven to be less than reliable, NSW users have lost confidence in the weapon and the weapon is becoming unsupportable due to US Army going to M240 series.

Therefore, a MNS/ORD was approved on 21 March 2001 for a new Lightweight 7.62mm Machine Gun (LWMG).

The 7.62mm LWMG program has been patterned after the MK46 program.
Combined Milestone Decisions/Approvals

Use of “Draft” Performance Specification to gain early Industry/User involvement and reduce risk

Establish “Go/No Go” Criteria for Product Samples to allow Early Elimination of Non-Compliant Products

Product Sample Testing prior to Source Selection Initial Technical Testing by Crane Operational Assessment directed by the Marine Corps Programs Department

IPPD with Integrated Source Selection (Users, Technical and Program Representatives)
ACQUISITION APPROACH

Best Value Award Determination

Will employ Adjectival Ratings

Factors will include such things as User Eval, Technical, Past Performance & Cost

Indefinite Delivery Indefinite Quantity Contract (IDIQ)
  Firm-Fixed Price/5 Year Option Availability
  IDIQ Min = 6 LWMGs (First Articles)
  IDIQ Max = 2500 LWMGs

Cradle-to-Grave Program/Project Management
Special Operations Peculiar Modification to the M4A1(SOPMOD)
Components of SOPMOD Block I
Capabilities Required:

- Standardized versatile weapons accessories
- Modular- meets needs across SOF mission scenarios
- Increased operator survivability and lethality by enhanced target acquisition, signature suppression, and fire control

Evolutionary Acquisition Subprograms:

- Block I
- Block II
- Block III
Future Programs
Day/Night M203 Sight

• Description:
  – Long range night sighting capabilities (day scope and reflex sight)
  – Provides day/night precision aiming for the M203
  – Improves weapon accuracy

• Status:
  – RFP released Jul 00
  – Contract award planned for 1QFY02

• Desired fielding time frame: FY 02-04

• Funding level: $4-8M

For Industry Information
Future Programs
SOPMOD Block II, Group A

• Description:
  – Enhanced Grenade Launcher Module (EGLM) to replace M203
  – Platform Modifications (PMOD) to Rifles and Carbines
  – Family of Muzzle Break/Suppressors (FMBS)
  – Extended Life Barrel (ELB)
  – Visible Light Illuminator (VLI)
  – Enhanced Combat Optical Sight for SPR (ECOS-SPR)

• Status:
  – CAA released Jun 01
  – Contract award planned for 3QFY01

• Desired fielding time frame: FY 04-08 for EGLM, 02-04 for all others

• Funding level: $4-8M

For Industry Information
Future SOPMOD Programs
Enhanced Combat Optic Sight, Carbine (ECOS-C)

• Description:
  – Combines capabilities of existing sights
  – Multi-functional day optics
  – Illuminated reticle

• Status:
  – ORD approved Oct 99
  – RFP planned for 4QFY02

• Desired fielding time frame: FY04-06

• Funding level: $8-9M

Business Opportunities for Industry
Future SOPMOD Programs
Clip-on Night Vision Device (CNVD)

• Description:
  – Image intensifier, thermal imager, or a sensor-fusion day/night, all weather observation, and aiming device

• Status:
  – ORD approved Oct 99
  – RFP planned for 4QFY02

• Desired fielding time frame: FY04-06

• Funding level: $11M
