**Report Documentation Page**

Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

*Standard Form 298 (Rev. 8-98)*
Prescribed by ANSI Std Z39-18
SYNOPSIS

ALTHOUGH HVOF IS A NEW PROCESS TO MATURE AIR FORCE ENGINES, ITS APPLICATION IS NEVERTHELESS GROWING. ALTHOUGH THE PROCESS AND PROGRESS OF THIS INSERTION VARIES GREATLY FROM ENGINE PROGRAMS, IT IS EVIDENT THE DESIGNERS AND MAINTainers OF ENGINES FORESEE HVOF AS AN ATTRACTIVE COATING PROCESS. TO THAT END, THE AIR FORCE, WITH PEWG SUPPORT, IS PURSUING AND MAKING PROGRESS IN VALIDATING APPLICATIONS AND ESTABLISHING CAPABILITY. THIS BRIEFING SUMMARIZE WHERE WE ARE AT TODAY AND WHERE WE ARE GOING
ENGINES WITH HVOF APPLICATIONS

- **TF33**
  - Bearing journals
  - PEWG supported effort
  - Engine test validated
  - Tinker qualification in work

- **F101/F110/F118**
  - Disk dovetail, shaft journal, fan blade platform
  - CIP repair effort
  - Currently out sourced
  - Tinker qualification in work
• F100
  – Drum rotor, oil wetted bearing compartments
  – CIP repair effort
  – Engineering validation of drum rotor via similarity to TF33
  – Engine test required for oil wetted application
  – Planned for Tinker repair
• T56
  – Gearbox components
  – CIP repair effort
  – Engineering validation based on Joint Test Protocol
  – PBA repair workload
  – Standard Aero have HVOF capability but will need additional unit
  – Funding requirement submitted (POM)

• TF39
  – Applications based on CF6 experience proposed
OUTLOOK

• NO LONGER AN EMERGING PROCESS
  – Choice replacement for chrome plate
  – Proven next generation coating process
  – Alternatives to proprietary process
    GatorGard
    D-Gun
  – Growing in Air Force application
    Propulsion
    Air frame
    Accessories
HVOF AT TINKER

- DEVELOPMENT OF TINKER CAPABILITY
  - One booth operational
  - Additional booths
    - Infrastructure available for one more booth
    - Dedicated booth for airfoil coating planned
  - Grinding capability
  - NDI issues
TEAM TINKER

U.S. AIR FORCE
