Ordinance and Tactical Systems

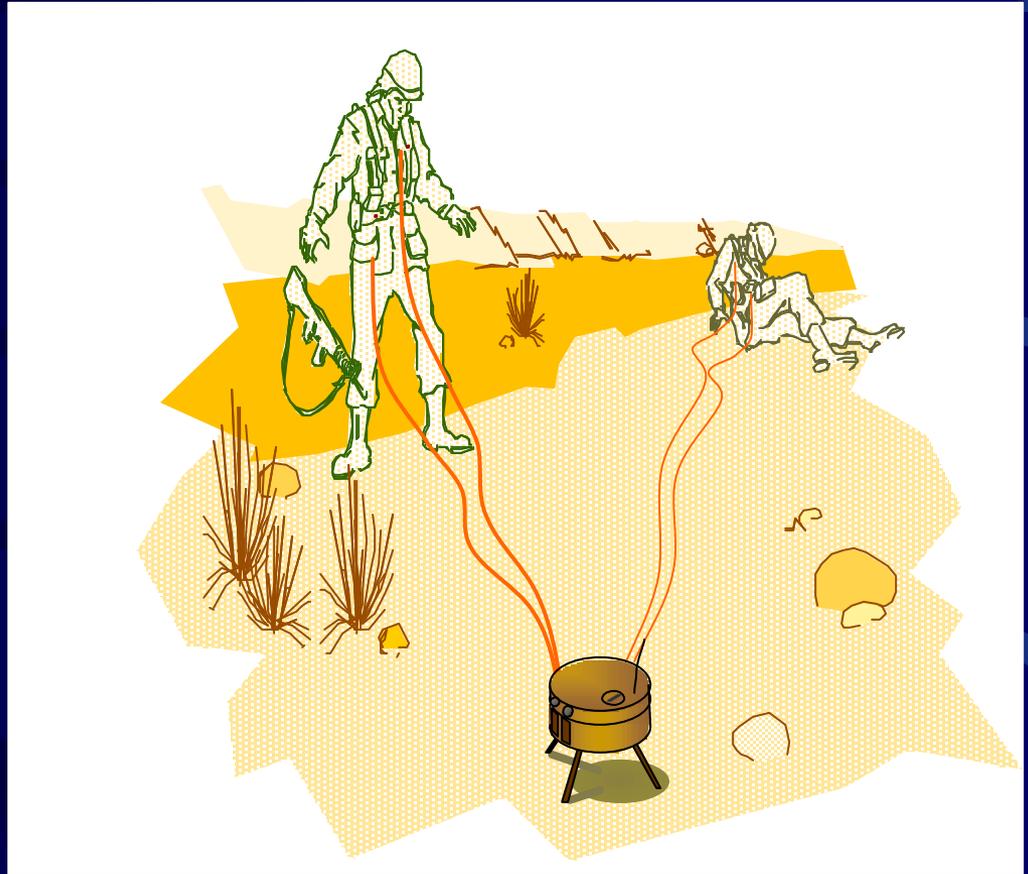

The Law Enforcement Taser in Action

The History of Non-Lethal Physical Incapacitation Systems

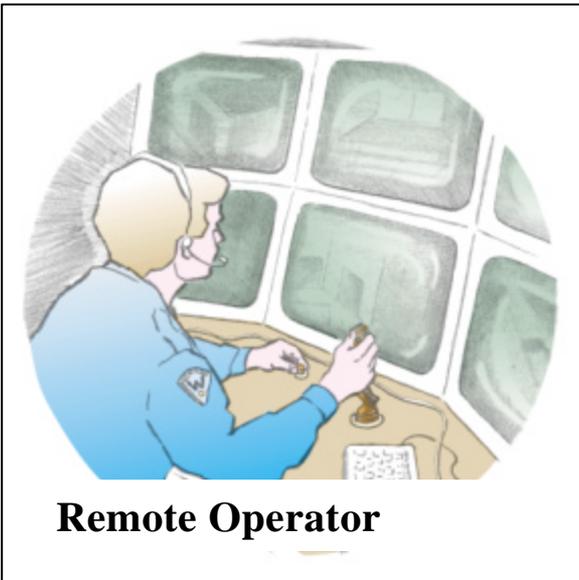

- **Taser Area Denial Device (TADD)**
- **A non-lethal alternative to the anti-personnel landmine.**
- **Successful ARDEC contract completed in June 2000.**
- **TADD technology is the core of the Sentinel device**

THE SENTINEL IN ACTION

The Sentinel device

Remote Operator

The Benefits of the Sentinel

- Remote Control/Operation
- Man-in-the-Loop
- Immediate Response
- Proven Safe/Effective Incapacitation
- No Hazardous Material/Chemicals
- No Clean Up
- Constant Force on Target
- Accurate/Precision Aimed
- Cost Effective

Correctional Facility Application

Perimeter Defense Application
