

Global Force Management Data Initiative (GFM DI) Overview Briefing

National Defense Industrial Association

7 Mar 2007

This briefing is classified
UNCLASSIFIED

To provide an overview of the Global Force Management Data Initiative (GFM DI)

- GFM DI will make force structure authorization data visible, accessible and understandable across the Department
- GFM DI will provide the authoritative data source for all DoD force structure – to be used by and integrated with all other systems that use force structure (i.e. everything)
- Directed by Joint Planning Guidance VII, dated June 2006

Force Structure Pulls Everything Together

Today

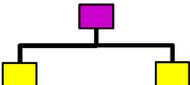

Problem: No common reference

Planning

Adaptive Planning
Plans
Capabilities
Risk Assessment

Force Structure A

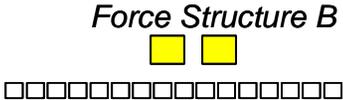

Programming/Budgeting

Programs
Appropriations

Force Structure B

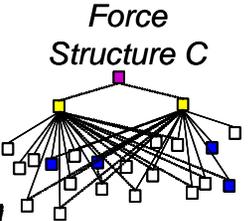

Execution

Military Materiel
Civilians
Contractors

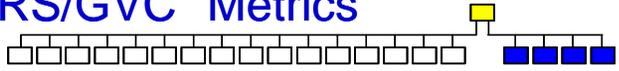

Force Structure C

Reporting

Readiness C2
DRRS/GVC Metrics

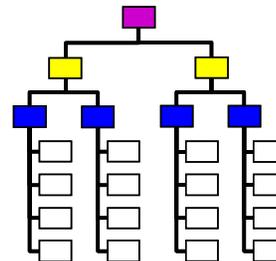

Force Structure D

Future

Solution: Common Force Structure reference

- Common Force Structure representation for **ALL** Domains and user needs
 - Consistent structure
 - High resolution
- Based on:
 - Command & Support Relationships
 - Time
- Visible and accessible from a single source in a net-centric environment
- Foundational for net-centricity:
 - Universal key to integrate data
 - Realizes the power of the information

BTA Strategic Objectives

Support the Joint Warfighting Capability of the DoD

Enable Rapid Access to Information for Strategic Decisions

Reduce the Cost of Defense Business Operations

Improve Financial Stewardship to the American People

To guide transformation of business operations throughout the Department of Defense and to deliver Enterprise-level capabilities that align to warfighter needs

Background—Capability Gaps

- It can take months to answer:
 - “where are my forces,”
 - “how much am I spending,” and
 - “what capabilities can I employ”
- Requires information from many different systems*
- 30+ DoD force structure authorization systems evolved separately...cannot easily exchange data
 - Command relationships are poorly documented
 - ADCON, COCOM, OPCON not always captured
 - Deployments and activities still recorded manually

GFM DI addresses these shortfalls

DoDI 8260.03 directs GFM DI to be the authoritative data source for all force structure users

- Each “Component” (OSD, Joint, Services) will build and maintain an “Org Server” with force structure data to be shared and used in the Enterprise
- Unique identifiers will associate billets, crews, equipment, and chain-of-command links, allowing easy machine manipulation
- Provides a common reference for DoD business, readiness, and C2 IT systems
 - Everyone uses the same force structure foundation, with well-defined Command Relationships
 - Allows integration of “authorization” data with “on-hand” systems
 - Enables DRRS, GVC, DIMHRS, Adaptive Planning, NECC, SFIS, and future systems

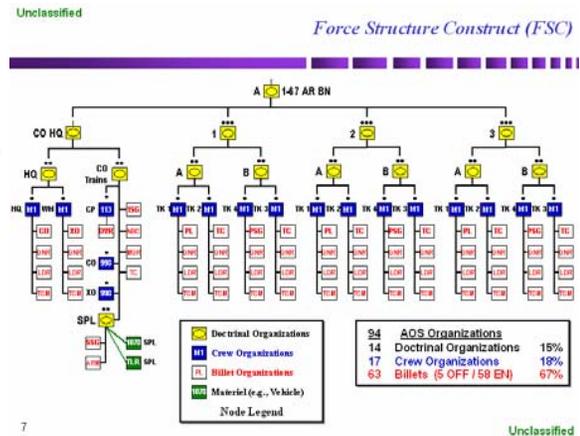

Objective is to develop a single construct that everyone (read computer systems and humans) uses

- Managed through the GFM Community of Interest (COI)
- Incorporates everyone's needs
- Give systems the same start point (i.e., the 'Authorized' structure)
- Provides common understanding for different ways of doing business
- Uses North Atlantic Treaty Organization (NATO) Information Exchange Data Model as the start point for information exchange
- Allows unambiguous assembly of everyone else's data -- data that you need:
 - Force Structure (e.g., managing the force)
 - Resources (e.g., funding, personnel, equipment)
 - Assessment (e.g., analytic agenda)

Document

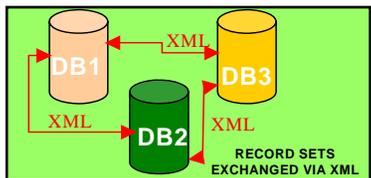

A joint way to electronically document “Authorized” force structure data for integration across Service-lines

- Organizational & Force Structure Construct (OFSC)
- All Organizations & their Cmd & Spt Relationships
- The GFMIEDM provides common data exchange
- The Organization Server is the single authoritative data source

Identify

- XML tagging for web services (e.g., discovery, collaboration, mediation, etc.)

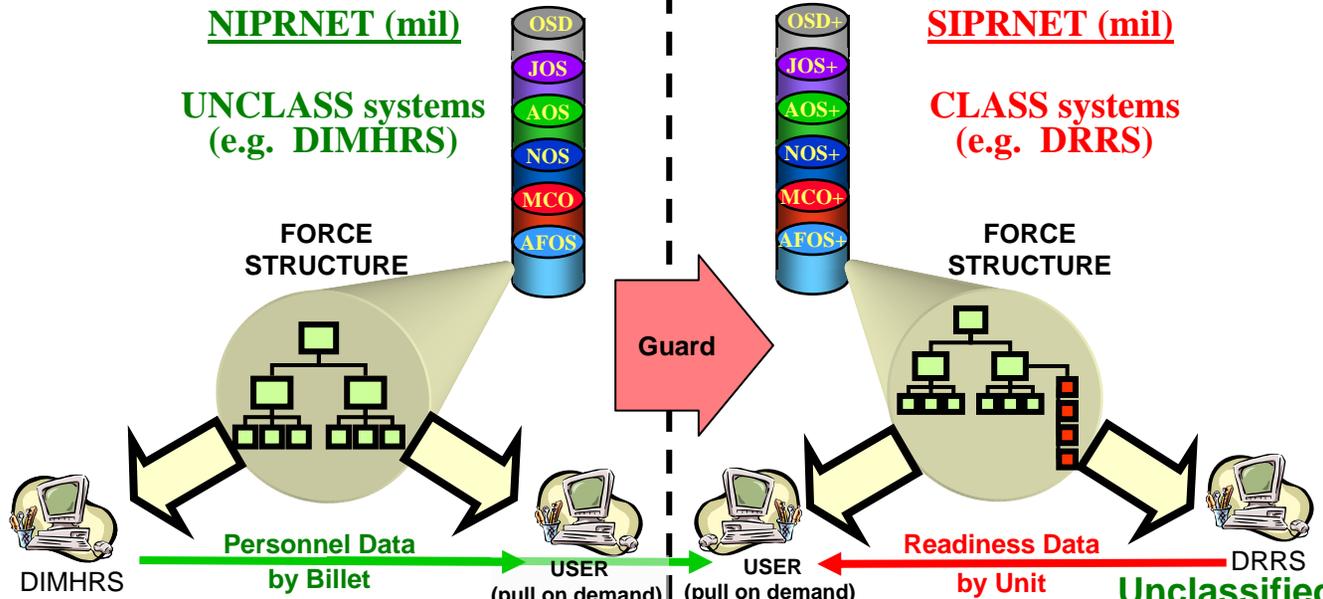

- FMIDS (unique data identifiers) to allow data integration

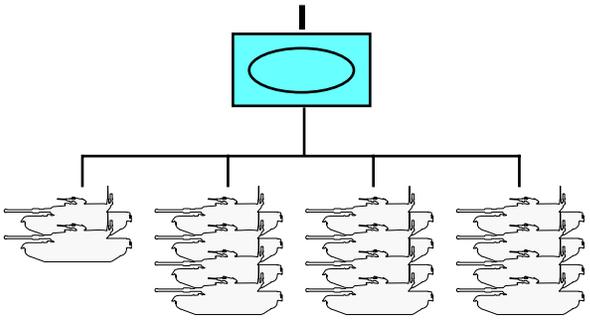

Disseminate

- Org Servers are the Authoritative Data Source
- Web-Service-enabled

Understanding 'What' is 'Where' "Authorized" versus "On-Hand"

How many are you supposed to have?

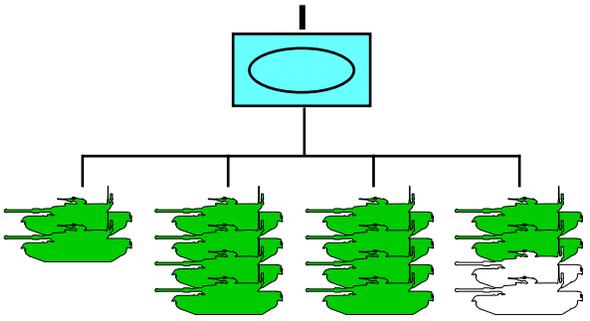

14

Authorization data
**Authorized by Law
and organized by the
Components**

Org Servers

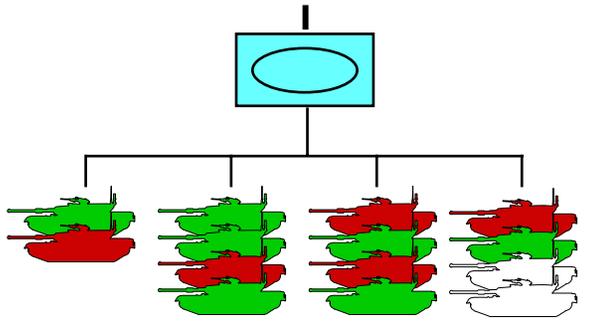

How many do you have?

12

"On-Hand" data
**Property Books &
Personnel Systems**

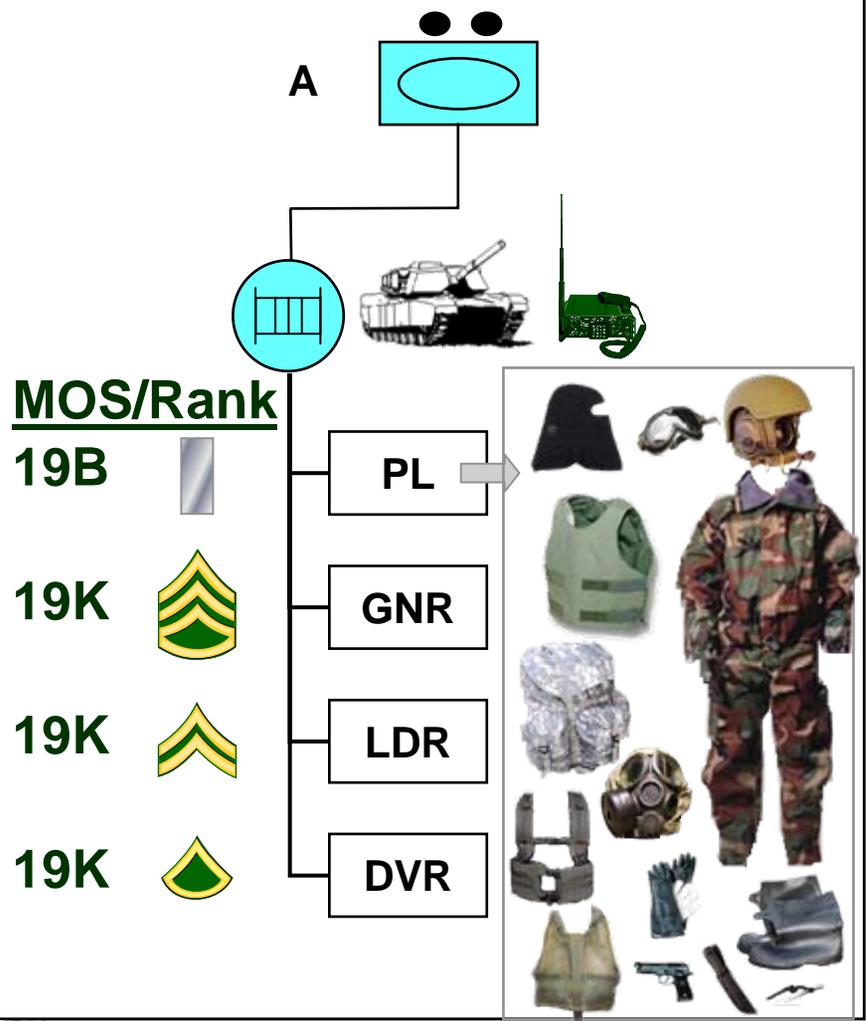

How many are working?

7

Readiness data
**Logistics &
Personnel Systems**

ORGANIZATION

Contains:

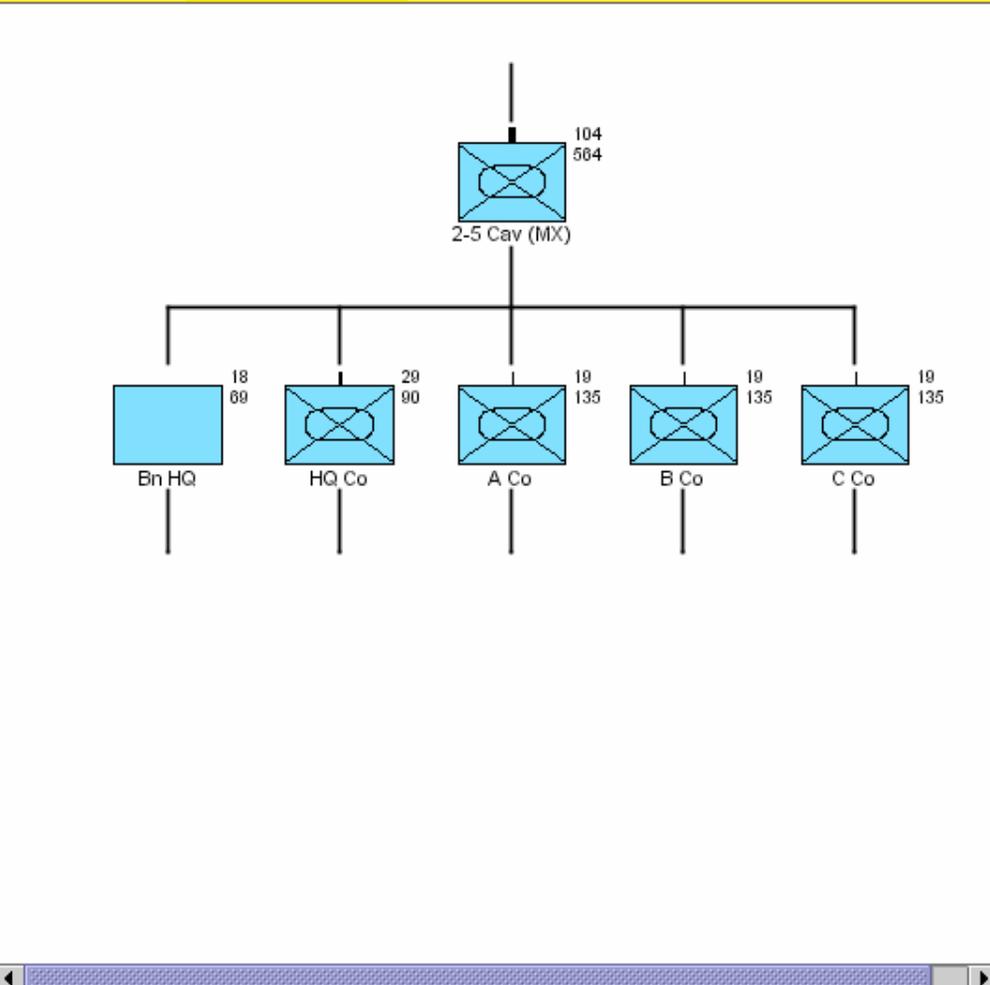

- People authorizations
 - Military
 - Government Civilians (GS, SES, part-time, job share)
 - Non-Government Civilians (NAF, Contractors, Volunteers)
- Equipment authorizations
- Home station
- Relationships
- Names (e.g., the OUID)
- Graphics (Mil Std 2525B)
- Definitions

Force Developers maintain the data!

- Prepared a “Combat Slice” from each of the Services and putting it into GFMIEDM format
 - Navy – 2nd Expeditionary Strike Group (ESG)
 - USMC – 22nd Marine Expeditionary Unit (MEU)
 - Army – 1st Brigade Combat Team, 1st Cavalry Division
 - Air Force – CAF AEW / ISR AEG (AETF)
- Simultaneously prepared the Concept of the Operations (CONOPS) in three areas:
 - Organization Server Operations
 - Allocation, Assignment & Apportionment process
 - GFM in a net-centric environment

Objectives: Define business rules, flush out GFMIEDM, demonstrate capabilities, and data standard of GFM DI prototype to enable the Services to build the Org Servers

Org Type Tree **Organization Tree**

Organization: 2nd Battalion, 5th Cavalry

Qty	Name	Categ...
1	2nd Battalion, 5th Cavalry	UN
1	Battalion Headquarters	UN
1	Command Section	UN

The same unit can have multiple command & support relationships (“Links”) “Assignment” information – shows all forces assigned to COCOMs

- Force structure authorization data visible and accessible for operational force by Sep 08
 - OSD, Joint, USMC – Sep 07
 - USA, USN, USAF – Sep 08
 - Authorization data for all forces that could be assigned to Combatant Commanders. Includes:
 - Active, Guard, and Reserve forces
 - Embedded civilian & contractor
 - Unique Equipment (i.e., crew vehicles)
- Phased implementation and linked to on-hand data by Sep 09

Points of Contact (Joint Staff J8 MASO):

- **Mr. George Sprung (703) 697-7413**
- **COL Phil Beaver (703) 697-7729**
- **LTC Ilean Keltz (703) 697-7424**
- **Maj Glenn Hillis (703) 697-7544**

- **Dr. Sam Chamberlain (ARL) (410) 278-8948**
