AIT and passive RFID

August 2009

Mark Lieberman

# Agenda

---

- About RFID
- RFID in DoD
- WAWF
- Tagging
- RFID in DLA
- Benefits
- Resources
- Summary

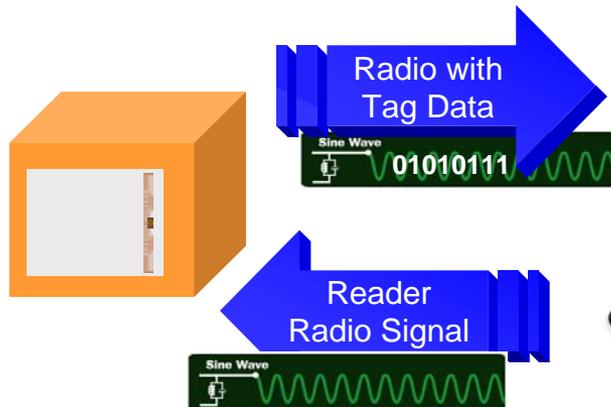

# How Does passive Radio Frequency Identification (RFID) Work?

- Tags emit radio signals
- Devices called Readers pick up the signal

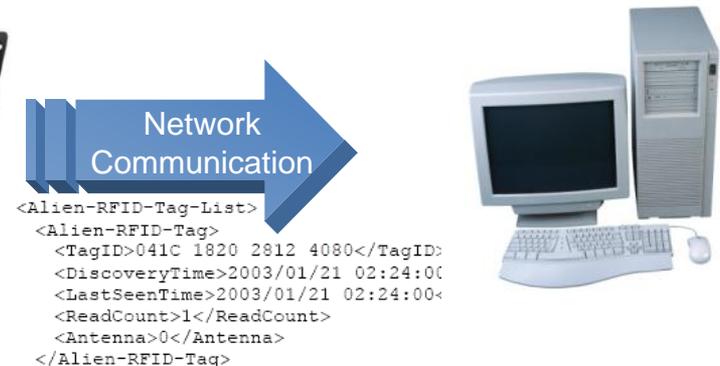

## Tagged Asset

## Readers

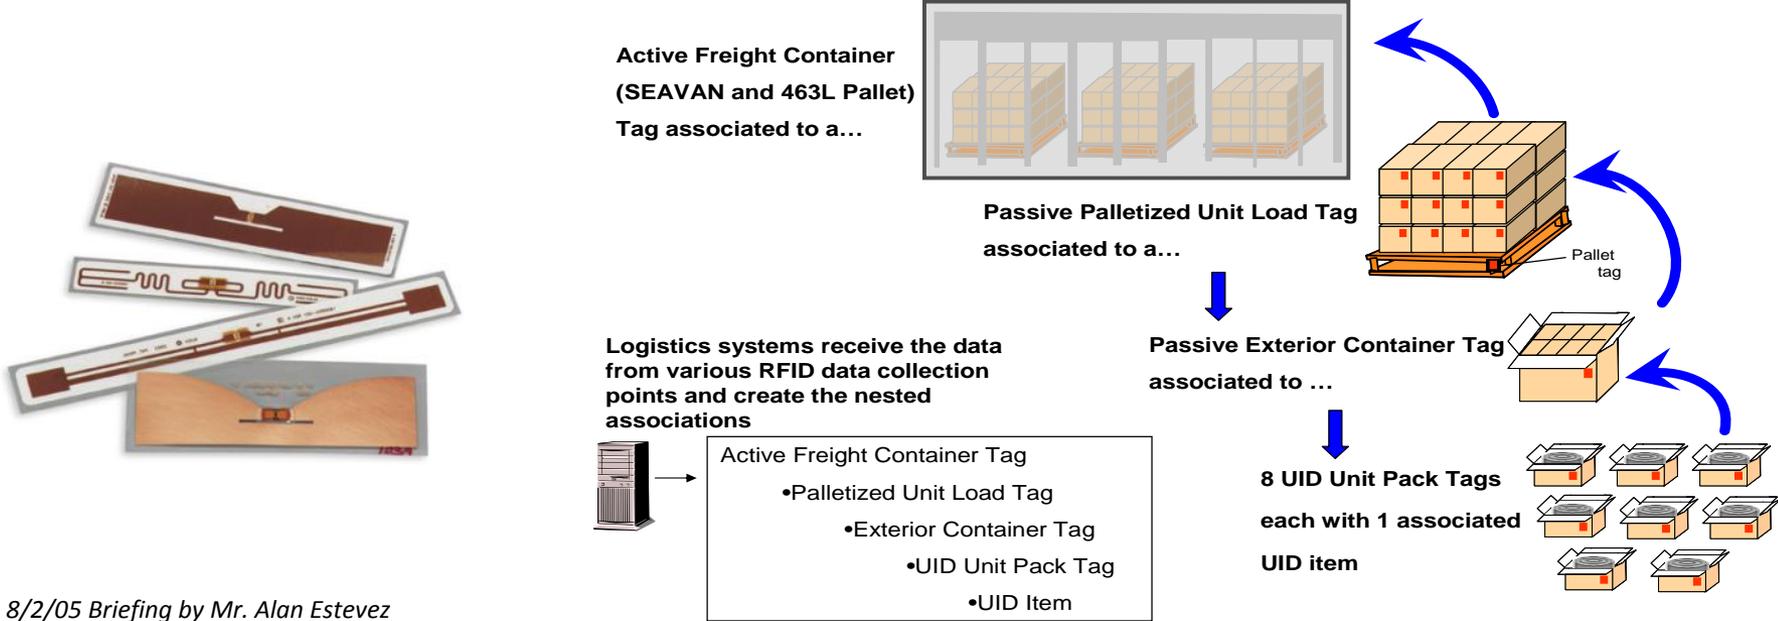

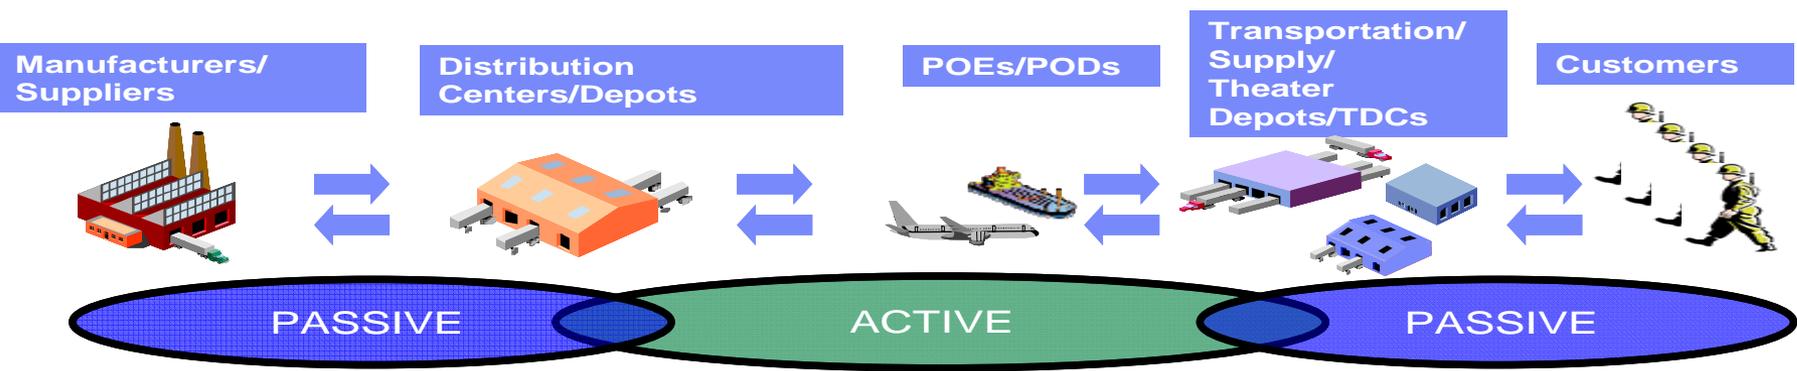

## IT Infrastructure

# How Does DoD Uses RFID

Source: 8/2/05 Briefing by Mr. Alan Estevez  
Assistant Deputy Under Secretary of Defense (Supply Chain Integration)

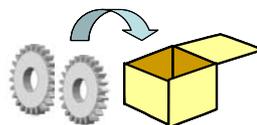

# AIT Layers

Layer 0 UID – Product Item

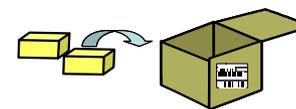

2D Matrix  
Linear Bar Code

Layer 1 – Package

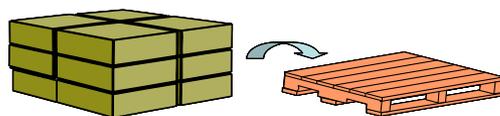

Passive RFID  
2D/Linear Bar Code

Layer 2 – Transport Unit  
(cartons, boxes)

Passive RFID  
2D/Linear Bar Code

Layer 3 – Unit Load (Warehouse pallet, tri-wall packaging, commercial fiberboard)

Passive RFID  
2D/Linear Bar Code

Layer 4 – Freight Container  
(sea vans, 463L pallets with net)

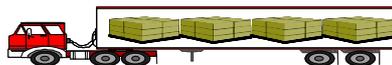

Active RFID License Plate  
2D/Linear Bar Code

Baseline AIT

Primary  
Back Up

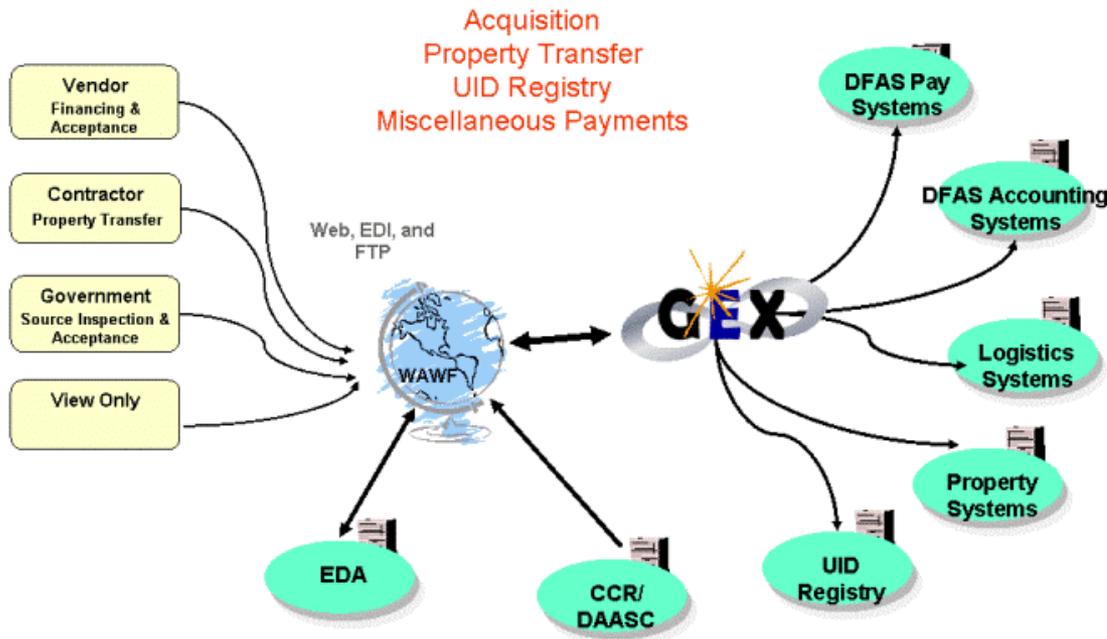

Layer 5 – Movement Vehicle (truck, aircraft, ship, train)

# Wide Area Work Flow

## Wide Area Workflow (WAWF)

- Secure Web-based system for electronic invoicing, receipt and acceptance
- WAWF creates a virtual folder to combine the three documents required to pay a Vendor
  - Contract
  - Invoice
  - Receiving Report.
- Supports paperless acquisition process.
- Public Key Infrastructure (PKI) digital signature security

**Streamlines the process from Weeks to Days or Minutes.**

# When are pRFID tags required?

---

Passive RFID tags at the case and pallet levels when the following three factors are true:

1. Contract contains passive RFID DFARS clause (DFAR 252.211-7006), specific language requiring RFID tags.
2. Your equipment/commodity falls under the classes of supply required to be tagged as described in the passive RFID DFARS clause.
3. Your equipment/item is being shipped to one of the RFID-enabled/implemented locations listed in the passive DFARS clause or a location specified by the contracting officer in your contract.

The most recent version of the passive RFID DFARS clause is available at <http://www.acq.osd.mil/dpap/dars/dfars/html/current/252211.htm#252.211-7006>.

# Tagging Options

## Automated Labeling

- Applicators / RFID encoders can program and apply tags automatically on production lines.

## Print and Apply

- Similar to standard printed labels, RFID-enabled printers can print human readable information (barcode, etc) as well as program embedded RFID tags.

## Pre-Programmed Labels

- Tags are printed and programmed to comply with DoD

# DoD Tag Construct

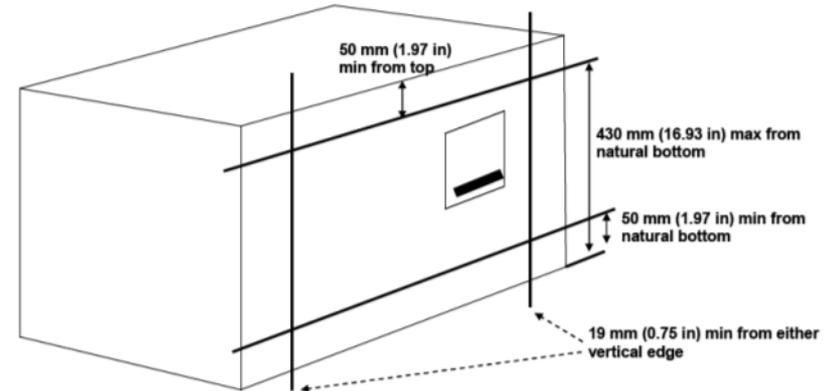

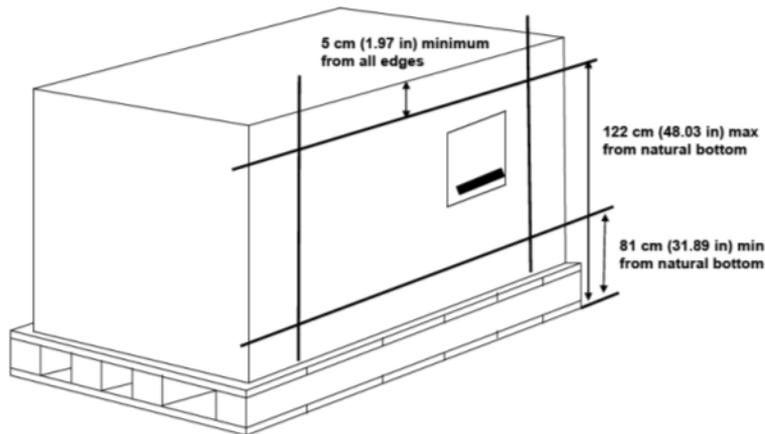

- Must encode an approved RFID tag data structure
- Suppliers that are EPCglobal subscribers and possess a GS1 company prefix may use any of the EPC Identifiers and encoding instructions described in the EPC™ Tag Data Standards document to encode tags.
- Suppliers who choose to employ the DoD construct will use their previously assigned Commercial and Government Entity (CAGE) code and encode the tags per the rules that follow.

Header			Filter			Gov't Managed Identifier	Serial number
<i>Identified DoD Construct</i>			<i>identifies the hierarchy represented using the following values:</i>			<i>Supplier CAGE Code</i>	<i>68+ Billion Unique</i>
8-bits			4-bits			48-bits	36-bits
<u>Hex</u>	<u>Binary</u>	<u>Desc</u>	<u>Hex</u>	<u>Binary</u>	<u>Desc</u>	ASCII "space" + 5 ASCII characters	(left fill with spaces)
2F	00101111	DoD Construct	0	0000	pallet		
			1	0001	case		
			2	0010	unit pack		

# Tag Placement

## RFID-enabled Label Placement on Palletized Unit Load

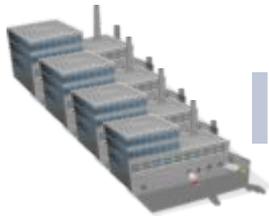

## RFID-enabled Label Placement on Case (Shipping and Exterior Container)

RFID-enabled labels are to be applied to shipping containers or palletized unit loads, in

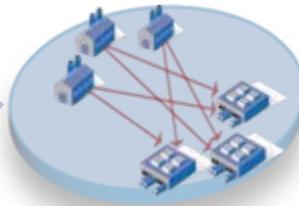

# DLA AIT Program

*Leverage Automatic Identification Technology in our logistics operations to better support the warfighter by reducing cost and improving service.*

**Suppliers:** Leverage Tagging Today

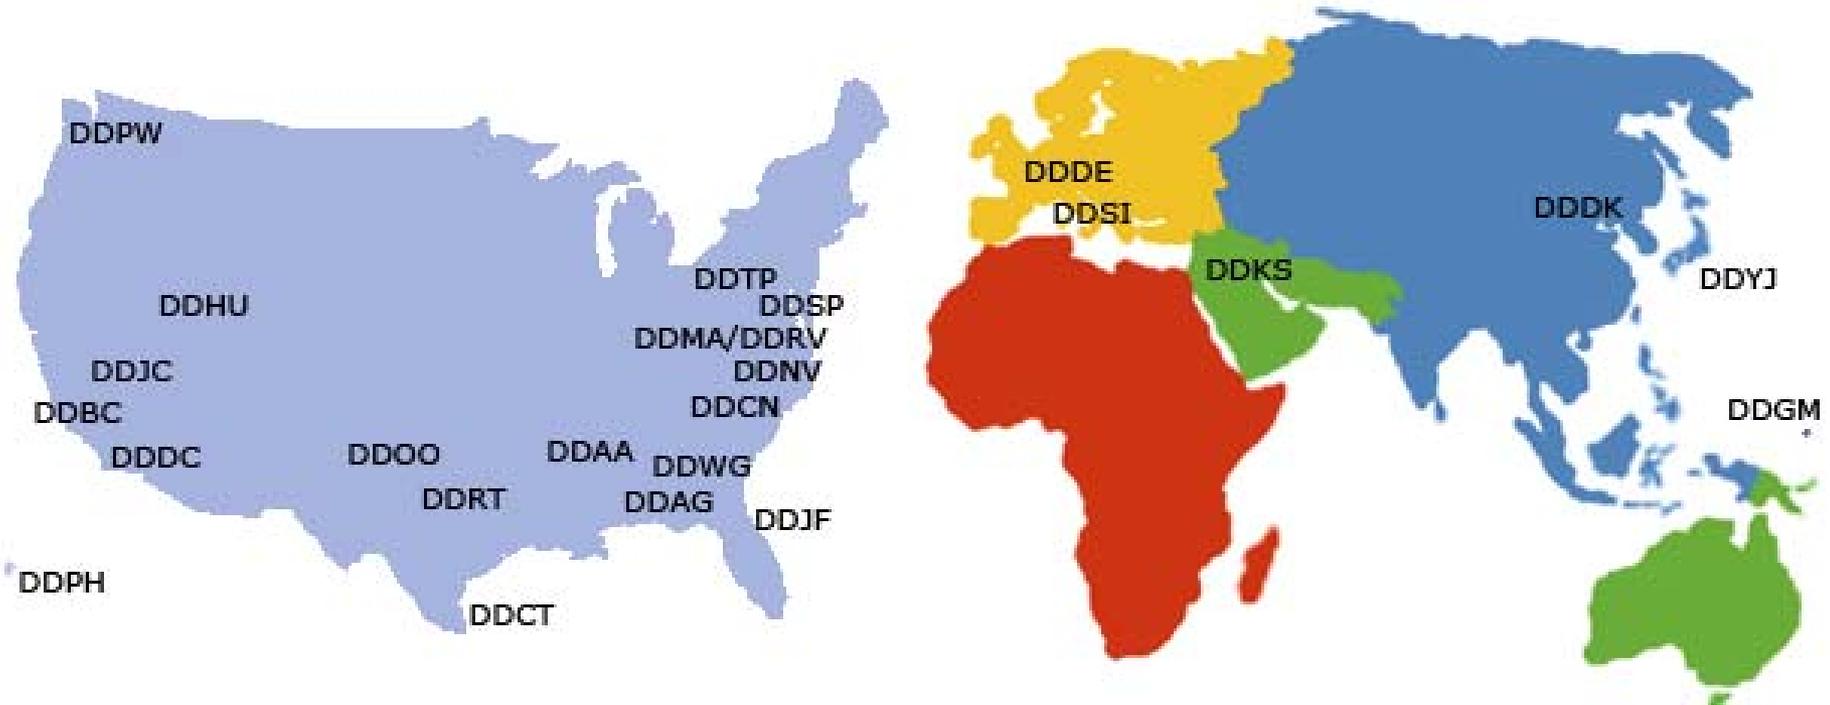

**Distribution:** Improve Operations

**Customer:** Improve Service

# Defense Distribution Centers

Distribution Depots receiving tagged RFID cases and pallets today

- CONUS: All Distribution Depots
- OCONUS: DDPH and DDGM

# RFID Benefits

---

## Supplier Benefits

- ✓ Improved planning
- ✓ Faster demand responses
- ✓ Reduced Bull Whip Effect
- ✓ Streamlined business processes
- ✓ Improved efficiency in the recall of defective items
- ✓ Increased ability to ensure that product(s) remain stocked on DoD's shelves
- ✓ **Faster receipt of payments for supplied goods**

## DoD Benefits

- ✓ Improved inventory management
- ✓ Improved labor productivity
- ✓ Elimination of duplicate orders
- ✓ Replacement of manual procedures
- ✓ Automated receipt and acceptance
- ✓ Improved inventory and shipment visibility and management
- ✓ Reduced shrinkage
- ✓ Enhanced business processes within the DoD
- ✓ Improved asset tracking

# Summary

---

- Passive RFID has benefits for DoD and its suppliers
- DoD Policy requires suppliers to tag cases and pallets for certain products into specific destinations
- By improving velocity and reliability, DLA will help make the defense supply chain a more effective weapon for use by the warfighter
