*National Defense Industrial Association, 17<sup>th</sup> Annual System Engineering Conference, Oct 27-30, 2014*

# Outline

- HSI Process Challenges
- HSI Process Opportunities: The HSI Framework (HSIF)
- HSIF Evolution
- HSIF Objectives
  - Develop an interactive HSIF application
  - Define and scope activities: HSI Integrator Role
  - Vet and adjudicate HSIF design and content
  - Develop training materials
- Recap of HSIF Benefits
- Technical Vision and Next Steps

# HSI Process Challenges

- HSI and Systems Engineering have established technical processes
- Coordination and integration challenges
  - Extensive HSI-related policy, standards, and guidance
  - Inconsistent application of HSI guidance and best practices
  - Stove-piped technical efforts within HSI domains
- Impacts
  - Lack of synchronization with SETR Events and Acquisition Milestones
  - Missed opportunities to reduce HSI re-work via collaboration
  - Misalignment of HSI technical priorities with program/project cost, schedule, and performance

# HSI Process Opportunities: The HSI Framework (HSIF)

- The HSIF consists of process diagrams that display HSI Domain activities across the DoD Acquisition Life Cycle
  - Includes references, products, cross-domain collaborations
  - Extracted from HSI-related guidance, standards, and best practices across DoD Services and non-DoD organizations
  - Displayed in a timeline format, referenced to Systems Engineering Technical Reviews and Acquisition milestones
- HSI Opportunities and HSIF Benefits
  - Serves as a coordinating mechanism between HSI domains
  - Makes HSI tasks and products explicit to other stakeholders: Program Managers, Technical Authority, System Engineers, and Prime Contractor
  - Leverages HSI best practices across services, organizations
  - Ensures continuity of HSI support throughout the lifecycle

# The HSI Framework (cont.)

- Intended uses for the HSIF
  - Describe the who, what, when, and why of ensuring human-centered system acquisition
  - Align HSI activities with Systems Engineering processes
  - Develop a roadmap of HSI workflow processes
  - Plan and scope HSI activities across the entire acquisition cycle
  - Represent what other domain SMEs are or should be doing at various points in time
  - Identify integration/trade-off opportunities between HSI domains
- HSIF is not
  - A decision-making, risk analysis, or tradeoff tool
  - A guide on how to conduct HSI activities
  - A set of HSI requirements: Activities must be tailored to program/project risks and available HSI funding

# The HSI Framework (cont.)

- Example user groups
  - HSI Domain SMEs / Practitioners
  - Logisticians
  - Program Managers
  - Technical Authorities / HSI Integrators
  - System Engineers
  - Prime Contractors
- Prerequisites for use
  - Basic knowledge of HSI and the Defense Acquisition System
  - Example experience: DAU Acquisition 101 Course, DAU Systems Engineering 101 Course, DAU HSI Course (CLE062), NPS HSI Certificate

# HSIF Evolution: Precursor HSI Methods

## HSI ACTIVITIES GUIDE

Note 1. This guide was developed to assist the program manager in determining the HSI acquisition requirements. This guide may be tailored to fit the needs of each program.

HSI Activities by Acquisition Phase	0	I	II	III
Identify mission and function requirements	X			
Provide HSI inputs to new system/NDI/PI decision	X			
Identify HSI constraints and issues	X			
Establish the HSI data base	X			
Identify HSI high cost drivers and lessons learned from predecessor system	X			
Identify system requirements that impact on the human role	X	X	X	
Identify HSI technology requirements	X			
Identify tools/data bases/analyses/methodologies to be employed	X		X	
Provide HSI inputs to the assessment of alternative concepts/designs	X	X		
Develop HSI exit criteria considerations for each milestone	X	X	X	X
Conduct HSI studies, analyses, and tradeoffs	X	X	X	X
Conduct HSI front-end analysis for each alternative concept/design	X			
Describe how HFE and SS/HH lessons learned will be applied	X			
Identify HSI technical risks for each alternative concept/design	X			
Identify manpower requirements and state manpower sources	X	X	X	X
Define requirements for new occupational specialties/high quality personnel	X	X	X	X
Identify training requirements and evaluate training system effectiveness	X	X	X	X
Provide HSI assessment and tradeoff of alternative concepts/designs	X			
Provide HSI inputs to life-cycle costs	X	X	X	
Budget MPT life-cycle costs	X	X	X	
Identify and manage HSI cost, schedule and design risk areas	X	X		
Incorporate HSI considerations into the acquisition strategy	X	X	X	
Identify HSI test and evaluation requirements	X	X	X	
Identify HSI inputs to procurement packages	X	X	X	X
Provide HSI inputs to affordability constraints	X	X		
Provide HSI inputs to affordability assessments	X	X	X	
Provide HSI inputs to the Concept Baseline	X			
Prepare the HSI plan		X		
Provide earlier phase products which are required in Phase I		X		
Refine manpower, personnel and training requirements		X	X	X
Prepare the Manpower Estimate (ME)		X	X	
Provide HSI inputs to the Development Baseline		X		
Conduct HSI test and evaluation on prototypes		X		
Review/update HSI plan			X	X
Provide earlier phase products which are required in Phase II			X	
Provide HSI inputs to the Proposed Production Baseline			X	
Provide earlier phase products which are required in Phase III				X
Conduct HSI follow-on test and evaluation				X
Include HSI requirements into engineering change proposals (ECPs)				X
Acquire HSI lessons learned	X	X	X	X

Department of the Navy (DON) Defense Acquisition Deskbook, Feb 1997

### HSI Activities Guide

- 40 HSI activities across 4 acquisition phases
- Developed to be tailored by the PM

### Acquisition Phases:

- **Phase 0:** Concept Exploration
- **Phase I:** Program Definition and Risk Reduction
- **Phase II:** Engineering and Manufacturing Development
- **Phase III:** Production, Fielding/Deployment, and Operational Support

- Identifying phase-dependent HSI activities has been done as early as 1997
- The HSIF combines and presents existing guidance in new and useful ways to accommodate changes in acquisition strategies and HSI policy

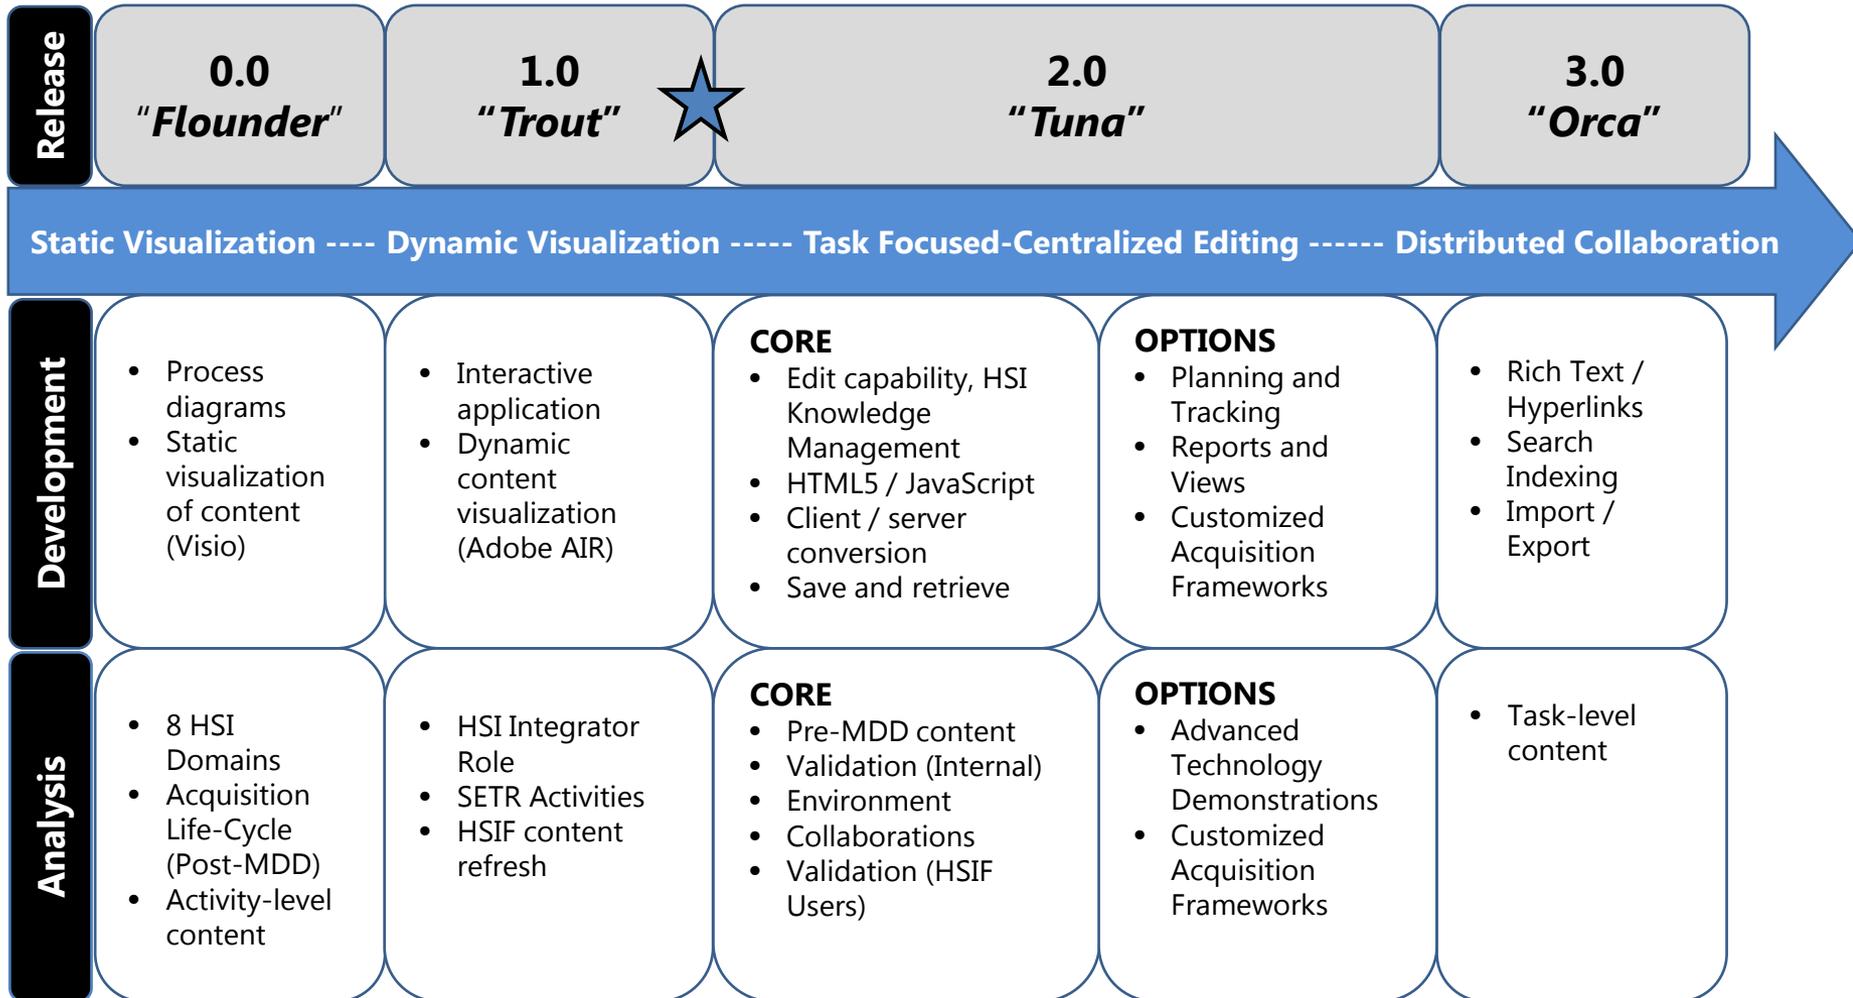

# HSIF Evolution: Analysis of existing HSI Process Tools

Tools	Similarities	Differences
<a href="#">DAU Timeline</a>	<ul style="list-style-type: none"> <li>Based on acquisition lifecycle</li> <li>Linked to SE processes</li> <li>Does not identify much HSI process</li> </ul>	<ul style="list-style-type: none"> <li>Does not outline cross domain collaboration</li> </ul>
<a href="#">Air Force HSI Guidance Documents</a>	<ul style="list-style-type: none"> <li>Based on acquisition lifecycle</li> <li>Linked to SE processes</li> <li>Tool for HSI practitioners</li> <li>Identifies inputs and outputs</li> </ul>	<ul style="list-style-type: none"> <li>Not interactive</li> <li>Text based</li> <li>Does not outline cross domain collaboration</li> </ul>
<a href="#">Naval Postgraduate School Defense Acquisition Framework</a>	<ul style="list-style-type: none"> <li>Based on acquisition lifecycle</li> </ul>	<ul style="list-style-type: none"> <li>Developed as an educational tool for coursework</li> </ul>
<a href="#">Naval Ordnance Safety and Security Activity – Web-based Interactive Safety Environment (WISE)</a>	<ul style="list-style-type: none"> <li>Based on acquisition lifecycle</li> </ul>	<ul style="list-style-type: none"> <li>Solely dedicated to safety domain</li> <li>Does not outline cross domain collaboration</li> </ul>
NASA: H-FAST	<ul style="list-style-type: none"> <li>Process based</li> </ul>	<ul style="list-style-type: none"> <li>More of a knowledge management tool</li> <li>Focus on HFE</li> <li>Does not outline cross domain collaboration</li> <li>Intended user is non-practitioner</li> </ul>

# HSIF Evolution: Roadmap

# HSIF Evolution: Collaboration w/ Navy HSI (SPAWAR)

Date	Version	Description
Mar 2009	HSI Practitioner's Guide	A <b>43-page HSI guide</b> for integrating human factors into DoD acquisition lifecycle to better communicate consistent program support activities
May 2009	HSI Framework 1.0	<b>Visualization of the practitioner guide</b> activities over the acquisition lifecycle, to include MPT domain activities
Sep 2009	HSI Framework 1.3	<b>Added HSI domain collaboration points;</b> drafted Safety and Occ Health domain activities; expanded integrated acquisition row to include documentation
Nov 2010	HSI Framework 1.4.1	<b>Added input documentation and output products</b> to each activity box for HFE row
Dec 2011	HSI Framework 1.5	Refined activity boxes to align with SPAWAR <b>HSI Work Package development</b>

## Early HSIF focus areas

- HFE and MPT
- IT-related Navy systems

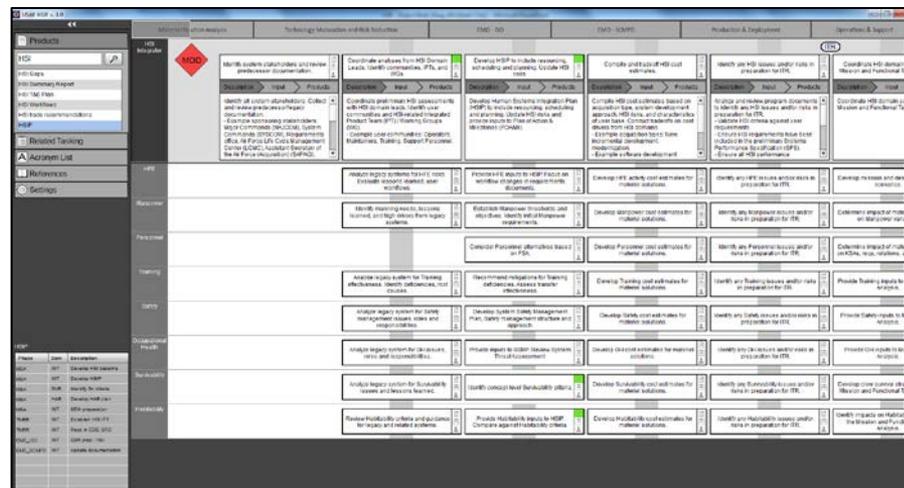

# HSIF Evolution: Collaboration w/ USAF HSI (711<sup>th</sup> HPW)

Date	Version	Description
Feb 2013	<b>AF HSIF 0.0</b>	<b>Included Safety, Occ Health, Survivability, and Habitability domain activities</b> in collaboration with USAF HSI (711 <sup>th</sup> HPW)
June 2013 – Aug 2014	<b>AF HSIF 1.0</b>	Developed an <b>HSIF interactive application</b> . Defined and scoped technical activities for an <b>HSI Integrator Role</b> . Conducted a full <b>vetting and adjudication of all HSIF content</b> .

## AF HSIF 1.0

- 8 HSI Domains, plus HSI Integrator Role
- 386 Activities across 6 Acquisition Phases
- 161 Unique References
- 215 Unique Products

# Use Case: HSI Practitioner

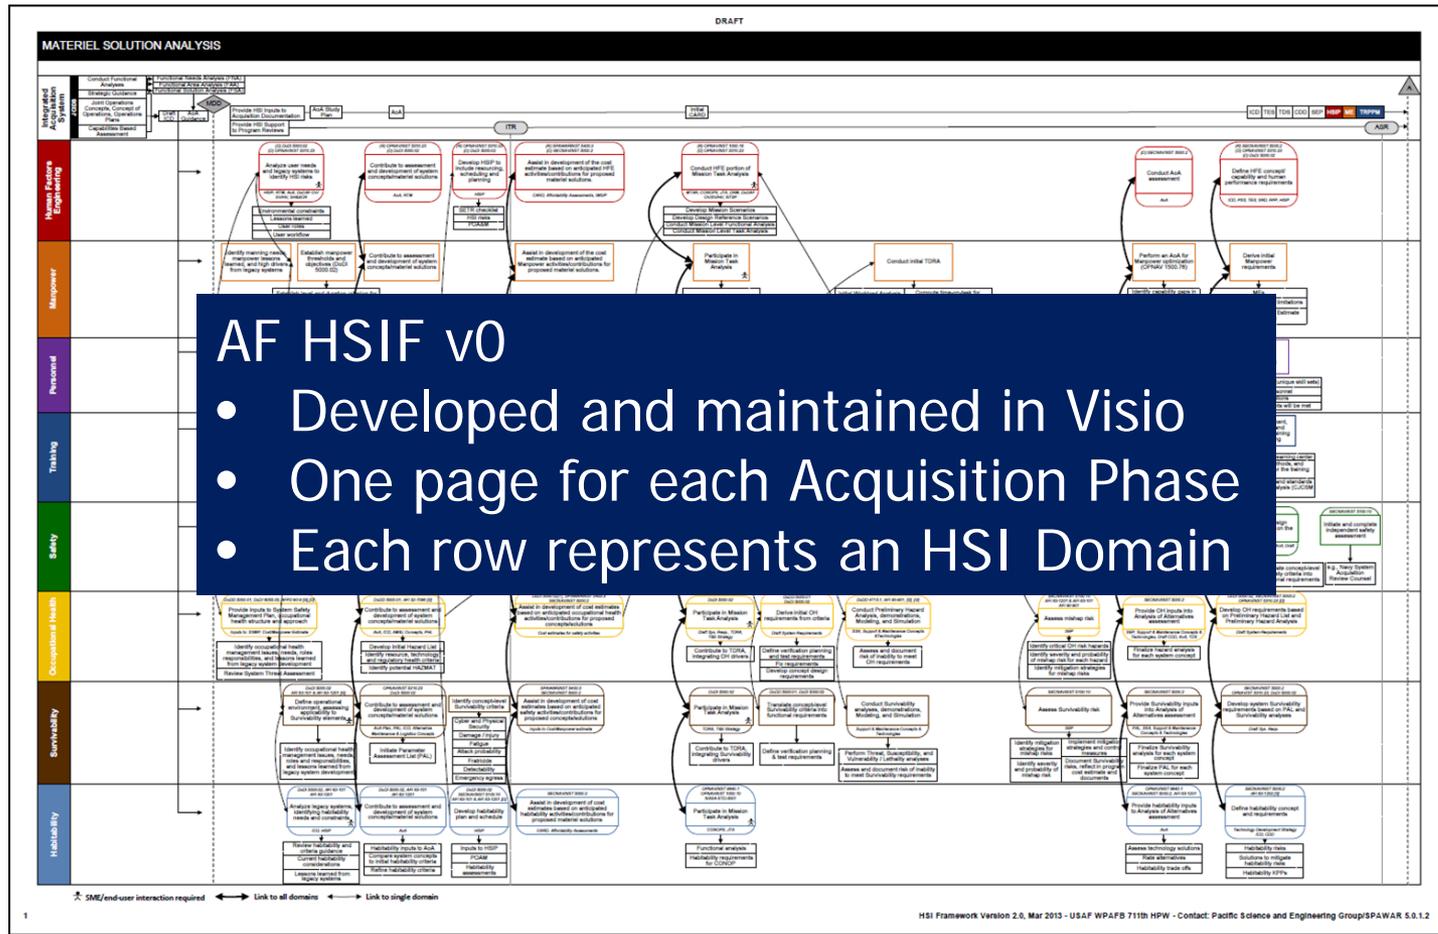

Role	User Stories
HSI Practitioner	<p><b>As an HSI Practitioner</b>, I need to identify content, timing, and collaboration points for HSI activities within the Acquisition Life Cycle, so that I can support Systems Engineering efforts timely and effectively.</p> <ul style="list-style-type: none"><li>• <b>Multi-service inputs:</b> As an HSI Practitioner, I need to identify guidance and best practices across services so that I can conduct technical activities efficiently and accurately.</li><li>• <b>Product traceability:</b> As an HSI Practitioner, I need to identify guidance and best practices across services so that I can conduct relevant technical activities.</li><li>• <b>Cross-domain collaboration:</b> As an HSI Practitioner, I need to identify similar technical activities across HSI Domains so that I can leverage HSI analyses efficiently.</li></ul>

Developed use cases to identify needs, support prioritization, and facilitate design

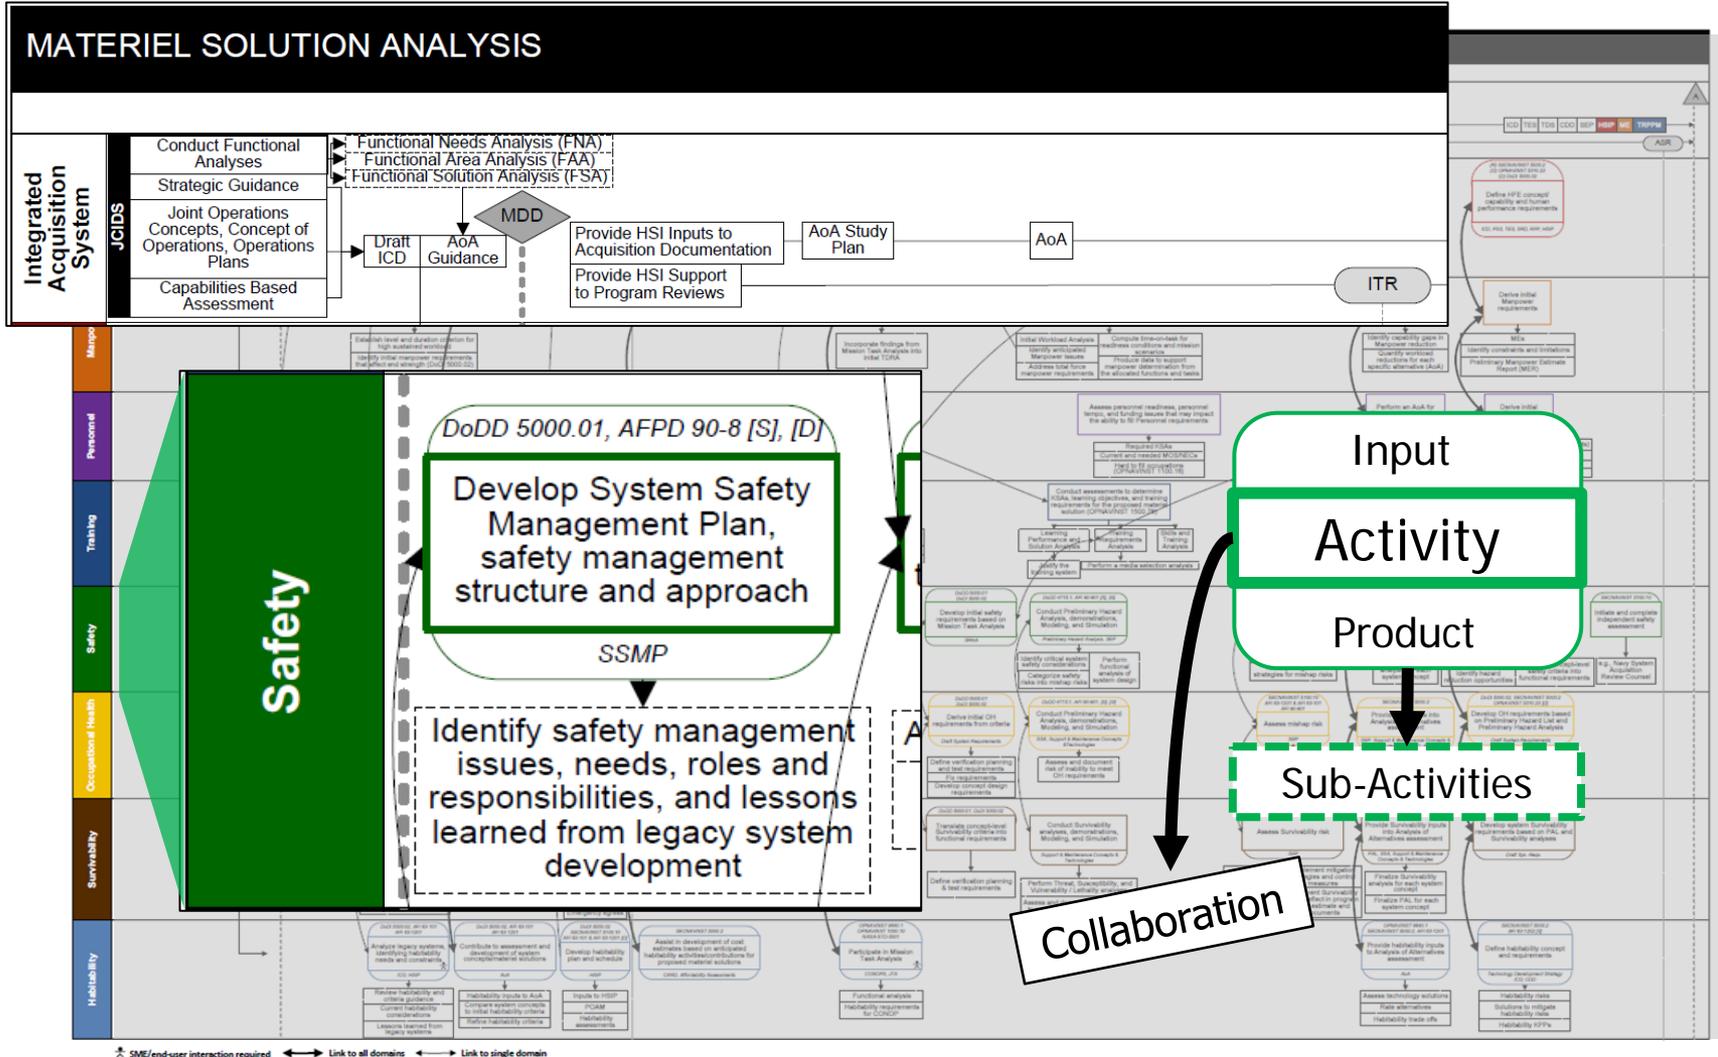

# AF HSIF v0: Static version

# AF HSIF v0: Static version (cont.)

# AF HSIF v1.0 Objectives

## 1. Develop an interactive HSIF application

- Mitigate limitations of static visualization: Clutter, accessibility, configuration management, expansion
- Add interactive features: Navigation, information access, product search, reference search, Quick Reference Guide
- Serves as a resource for the acquisition community: AFHSIO, PEOs, SPAWAR, Program Management Offices, Defense Acquisition University

2. Define and scope activities: HSI Integrator Role

3. Vet and adjudicate HSIF design and content

4. Develop training materials

# Interactive HSI F: Overview

USAF HSI F v. 1.0

	Material Solution Analysis	Technology Maturation and Risk Reduction	EMD - ISD	EMD - SCMPD	Production & Deployment	Operations & Support	
<b>HSI Integrator</b>	<p><b>MDD</b></p> <p>Identify system stakeholders and review predecessor documentation.</p> <p>Description   Input   Products</p> <p>Identify all system stakeholders. Collect and review predecessor/legacy documentation. - Example sponsoring stakeholders: Major Commands (MAJCOM), System Commands (SYSCOM), Requirements office, Air Force Life Cycle Management Center (LCCM), Assistant Secretary of the Air Force (Acquisition) (SAF/IAQ).</p>	<p>Coordinate analyses from HSI Domain Leads. Identify communities, IPTs, and WGs.</p> <p>Description   Input   Products</p> <p>Coordinate preliminary HSI assessments with HSI domain leads. Identify user communities and HSI-related Integrated Product Team (IPT) / Working Groups (WG). - Example user communities: Operators, Maintainers, Training, Support Personnel.</p>	<p>Develop HSIP to include resourcing, scheduling and planning. Update HSI risks.</p> <p>Description   Input   Products</p> <p>Develop Human Systems Integration Plan (HSIP) to include resourcing, scheduling and planning. Update HSI risks and provide inputs to Plan of Action &amp; Milestones (POA&amp;M).</p>	<p>Compile and tradeoff HSI cost estimates.</p> <p>Description   Input   Products</p> <p>Compile HSI cost estimates based on acquisition type, system development approach, HSI risks, and characteristics of user base. Conduct tradeoffs on cost drivers from HSI domains. - Example acquisition types: New, incremental development, modernization. - Example software development</p>	<p>Identify any HSI issues and/or risks in preparation for ITR.</p> <p>Description   Input   Products</p> <p>Analyze and review program documents to identify any HSI issues and/or risks in preparation for ITR. - Validate HSI criteria against user requirements. - Ensure HSI requirements have been included in the preliminary Systems Performance Specification (SPS). - Ensure all HSI performance</p>	<p>Coordinate HSI domain support Mission and Functional Task A</p> <p>Description   Input   Products</p> <p>Coordinate HSI domain support Mission and Functional Task A</p>	
<b>HFE</b>		<p>Analyze legacy systems for HFE risks. Evaluate lessons learned, user workflows.</p> <p>Provide HFE inputs to HSIP. Focus on workflow changes in requirements documents.</p>	<p>Develop HFE activity cost estimates for material solutions.</p>	<p>Identify any HFE issues and/or risks in preparation for ITR.</p>	<p>Develop mission and design re scenarios.</p>		
<b>Manpower</b>		<p>Identify manning needs, lessons learned, and high drivers from legacy</p>	<p>Establish Manpower thresholds and objectives. Identify initial Manpower requirements.</p>	<p>Develop Manpower cost estimates for material solutions.</p>	<p>Identify any Manpower issues and/or risks in preparation for ITR.</p>	<p>Determine impact of materiel s on Manpower variables</p>	
<b>Personnel</b>			<p>Consider Personnel alternatives based on FSA.</p>	<p>Develop Personnel cost estimates for material solutions.</p>	<p>Identify any Personnel issues and/or risks in preparation for ITR.</p>	<p>Determine impact of materiel s on KSAs, reqs, rotations, and d</p>	
<b>Training</b>			<p>Recommend mitigations for Training deficiencies. Assess transfer effectiveness.</p>	<p>Develop Training cost estimates for material solutions.</p>	<p>Identify any Training issues and/or risks in preparation for ITR.</p>	<p>Provide Training inputs to Missi Analysis.</p>	
<b>Safety</b>			<p>Develop System Safety Management Plan, Safety management structure and approach.</p>	<p>Develop Safety cost estimates for material solutions.</p>	<p>Identify any Safety issues and/or risks in preparation for ITR.</p>	<p>Provide Safety inputs to Missi Analysis.</p>	
<b>Occupational Health</b>			<p>Analyze legacy system for OH issues, roles and responsibilities.</p>	<p>Provide inputs to SSMP Review System Threat Assessment.</p>	<p>Develop OH cost estimates for material solutions.</p>	<p>Identify any OH issues and/or risks in preparation for ITR.</p>	<p>Provide OH inputs to Missior Analysis.</p>
<b>Survivability</b>			<p>Analyze legacy system for Survivability issues and lessons learned.</p>	<p>Identify concept-level Survivability criteria.</p>	<p>Develop Survivability cost estimates for material solutions.</p>	<p>Identify any Survivability issues and/or risks in preparation for ITR.</p>	<p>Develop crew survival strategie Mission and Functional Task A</p>
<b>Habitability</b>			<p>Review Habitability criteria and guidance for legacy and related systems.</p>	<p>Provide Habitability inputs to HSIP. Compare against Habitability criteria.</p>	<p>Develop Habitability cost estimates for material solutions.</p>	<p>Identify any Habitability issues and/or risks in preparation for ITR.</p>	<p>Identify impacts on Habitability c the Mission and Functional Analysis.</p>

Settings

Phase	Dom	Description
MSA	INT	Develop HSI baseline
MSA	INT	Develop HSIP
MSA	SUR	Identify Sv criteria
MSA	HAB	Develop HAB plan
MSA	INT	MSA preparation
TMRR	INT	Establish HSI IPT
TMRR	INT	Req in CDD, SRD
EMD_ISD	INT	CDR prep - HSI
EMD_SCMPD	INT	Update documentation

# Interactive HSIF: Activities

Activity boxes display task description, inputs and products. Icons highlight relationships between tasks.

**1. Expand or collapse activity boxes.**

**2. Click tabs to step through activity workflow: Description, Input, and Products.**

**3. Product Task SME/User**  
Icons activate via overlays and search.

**Develop and review prototypes and mockups. Finalize HFE-related requirements.**

**Description** | **Input** | **Products**

**Description:** Iteratively develop and review prototypes, mockups, screenshots, drawings, and simulations.  
- Examples: Heuristic evaluations, Cognitive walkthroughs, Usability testing, Workspace evaluations.  
- Finalize HFE-related requirements.

**Input:**  
- DoDI 5000.02  
- SECNAVINST 5000.2E  
- SPAWARINST 5400.3

**Products:**  
- HEDA  
- D&CG  
- SSDD  
- HESD  
- RTM  
- HFE-related requirements  
- Assessment methods  
- Assessment metrics

# Interactive HSIF: Control Panel

Product Search, Acronym List, and downloadable References are located in the Control Panel. Search results are linked to the appropriate activity box.

**1** Acronym List

**2** Identify system stakeholders and review predecessor documentation.

Phase	Dom	Description
MSA	INT	Identify stakeholders
MSA	SUR	Analyze legacy
MSA	HAB	Review HAB criteria
MSA	SAF	SAF task analysis
MSA	INT	Define requirements
EMD_ISD	INT	CDR prep - HSI
OS	INT	Future ops needs

**3** Product Task SME/User

Icons activate via overlays and search.

# AF HSIF v1.0 Objectives (cont.)

1. Develop an interactive HSIF application
2. **Define and scope activities: HSI Integrator Role**
  - Identify core HSI Integrator Role functions
    - Conduct HSI planning and trade studies
    - Exercise leadership on collaborations between HSI Domains
    - Serve as an interface between HSI and Systems Engineering, especially during SETR and Acquisition Milestone reviews
  - Derive HSI Integrator Role content from core functions, as an additional row in the HSIF visualization
  - Adapt and edit existing HSIF structure and content, re-establish collaborations
3. Vet and adjudicate HSIF design and content
4. Develop training materials

# A New Role: The HSI Integrator

- Among HSI domains, responsibility and tasks to facilitate coordination and trade-offs remain unknown
- The HSI Integrator Role and related activities were developed to serve as an interface to coordinate between the HSI Domains
- HSI would benefit from a mechanism or role similar to a Chief Engineer to:
  - provide SoS/FoS oversight
  - facilitate trade-offs among domains
  - communicate HSI risk within an organization
  - Identify HSI trends across programs
- The HSIF defines these coordinating activities to facilitate the consistent application and effectiveness of HSI

# Use Case: HSI Integrator

Role	User Stories
HSI Integrator	<p><b>As an HSI Integrator</b>, I need to identify collaboration points so that I can engage HSI Domain leads timely and accurately.</p> <ul style="list-style-type: none"><li>• <b>HSI Planning:</b> As an HSI Integrator, I need to provide guidance to a program on developing a Human Systems Integration Plan (HSIP), so that HSI tasking is planned and scoped to support program needs.</li><li>• <b>HSI Requirements:</b> As an HSI Integrator, I need to identify requirements-related activities, so that I can ensure timely and effective technical support for a SETR.</li></ul>

# HSI Integrator Role: Overview

	Material	Solution Analysis	Technology Maturation and Risk Reduction	EMD - ISD	EMD - SCMPD
HSI Integrator	MDD	<p>Identify system stakeholders and review predecessor documentation.</p> <p>Description &gt; Input &gt; Products</p> <p>Identify all system stakeholders. Collect and review predecessor/legacy documentation. - Example sponsoring stakeholders: Major Commands (MAJCOM), System Commands (SYSCOM), Requirements office, Air Force Life Cycle Management Center (LCCM), Assistant Secretary of the Air Force (Acquisition) (SAF/AQ).</p>	<p>Coordinate analyses from HSI Domain Leads. Identify user communities and HSI-related Integrated Product Team (IPT) / Working Groups (WG). - Example user communities: Operators, Maintainers, Training, Support Personnel.</p>	<p>Develop HSIP to include resourcing, scheduling and planning. Update HSI risks.</p> <p>Description &gt; Input &gt; Products</p> <p>Develop Human Systems Integration Plan (HSIP) to include resourcing, scheduling and planning. Update HSI risks and provide inputs to Plan of Action &amp; Milestones (POA&amp;M).</p>	
HFE			<p>Analyze legacy systems for HFE risks. Evaluate lessons learned, user workflows.</p>	<p>Provide HFE inputs to HSIP. Focus on workflow changes in requirements documents.</p>	
Manpower			<p>Identify manning needs, lessons learned, and high drivers from legacy systems.</p>	<p>Establish Manpower thresholds and objectives. Identify initial Manpower requirements.</p>	
Personnel				<p>Consider Personnel alternatives based on FSA.</p>	
Training			<p>Analyze legacy system for Training effectiveness. Identify deficiencies, root causes.</p>	<p>Recommend mitigations for Training deficiencies. Assess transfer effectiveness.</p>	
Safety			<p>Analyze legacy system for Safety management issues, roles and responsibilities.</p>	<p>Develop System Safety Management Plan, Safety management structure and approach.</p>	
Occupational Health			<p>Analyze legacy system for OH issues, roles and responsibilities.</p>	<p>Provide inputs to SSMP. Review System Threat Assessment.</p>	
Survivability			<p>Analyze legacy system for Survivability issues and lessons learned.</p>	<p>Identify concept-level Survivability criteria.</p>	
Habitability			<p>Review Habitability criteria and guidance for legacy and related systems.</p>	<p>Provide Habitability inputs to HSIP. Compare against Habitability criteria.</p>	

# HSI Integrator Role: Collaboration w/ HFE

## HSI Integrator Role

- Defined 59 activities in collaboration with the 711<sup>th</sup> Human Performance Wing
- Linked activities to 22 SETR events, Audits, and Milestones

**HSI Integrator**

Coordinate analyses from HSI Domain Leads. Identify communities, IPTs, and WGs.

**Description**   **Input**   **Products**

Coordinate preliminary HSI assessments with HSI domain leads. Identify user communities and HSI-related Integrated Product Team (IPT) / Working Groups (WG).  
- Example user communities: Operators, Maintainers, Training, Support Personnel

**HFE**

Analyze legacy systems for HFE risks. Evaluate lessons learned, user workflows.

**Description**   **Input**   **Products**

Analyze user needs and legacy systems to identify HFE risks. Evaluate constraints, lessons learned, user roles and user workflows.  
- Assess and identify applicable HFE environment, support environment, doctrine, and operational concepts.  
- Collect lessons learned from legacy systems.

# AF HSIF v1.0 Objectives (cont.)

1. Develop an interactive HSIF application
2. Define and scope activities: HSI Integrator Role
3. **Vet and adjudicate HSIF design and content**
  - Develop criteria for integrating HSI content
    - Suitable for HSI practitioners
    - Supports a range of Acquisition programs
    - Clear relationship to SE/Acq/HSI products
    - Practitioner-friendly: Handbooks, Guidance, Data Templates
  - Conducted 10 Working Groups
  - Adjudicated 342 comments from 5 review sessions
4. **Develop training materials**
  - Created a HSIF Quick Reference Guide
  - Training Brief

# Recap of HSIF Benefits

- For HSI Practitioners and System Engineers
  - Provides explicit technical guidance for HSI Domains that is both policy-driven and product-focused
  - Leverages HSI best practices across services, organizations
  - Facilitates and communicates HSI planning among stakeholders
- For Program Managers
  - Provides a list of potential HSI-related activities that can be tailored to manage program technical risks
  - Makes HSI tasks and products explicit to system stakeholders
- For those serving as the HSI Integrator Role
  - Serves as a coordinating mechanism between HSI domains
  - Improved technical alignment to System Engineering Technical Review (SETR) events and Acquisition Milestones

# HSIF Next Steps

- Add Edit capability and HSIF Knowledge Management
  - Provide user interface to edit activities, products, and references
  - Includes annotations, due date fields, activity status tracking
- Transition to web-based technologies
  - Improves accessibility and content distribution
- Pre-MDD Content Analysis
  - Include Capability Planning & Analysis (CP&A), Concept Development (CD), AoA, ICD activities
- Add Environment domain row
- Expand use cases to include additional stakeholders

# Additional Stakeholder Use Cases

Role	User Stories
Program Manager	<b>As a Program Manager</b> , I need to identify HSI activities for my project or program, so that I can accurately and efficiently plan and scope resources for HSI tasking.
Lead Engineer	<b>As a Chief Engineer</b> , I need to identify the timing of HSI activities, so that I can ensure HSI activities are aligned with SE activities.
Technical Authority	<b>As a Technical Authority</b> , I need to identify HSI activities to be completed prior to each SETR, so that I can scope the review and provide a relevant HSI evaluation.
Test Lead	<b>As a Test Lead</b> , I need to identify HSI analyses and products that involve end users, so that I can leverage operational test cases and data for T&E events.

# HSIF Vision

- HSIF Content Expansion
  - **Full HSI representation:** Include additional DoD Services and government agencies that practice HSI
  - **Pre-MDD Phase:** Include HSI to “the left” to include R&D
  - **Continuous content improvement**
    - Working Groups to elicit feedback from HSI user base: HSI domain SMEs, system engineers, program management
- HSI Integrator Role
  - **Linked to DoD-wide HSI Standards:** Technical tasks derived from Standards, best practices to inform Standards
  - **Expanded collaborations:** Library of successful collaboration points available to all HSI Integrators and project/program managers
- HSIF Structure
  - **Adapts to emergent Acquisition Models:** Interim DoDI 5000.02
