

Focused Logistics

Colonel Scott G. West
Joint Staff, J4

06 March 2001

Focused Logistics

Rapid Response/Rapid Distribution

Precise Application of Logistics

Total Asset Visibility and Intransit Visibility

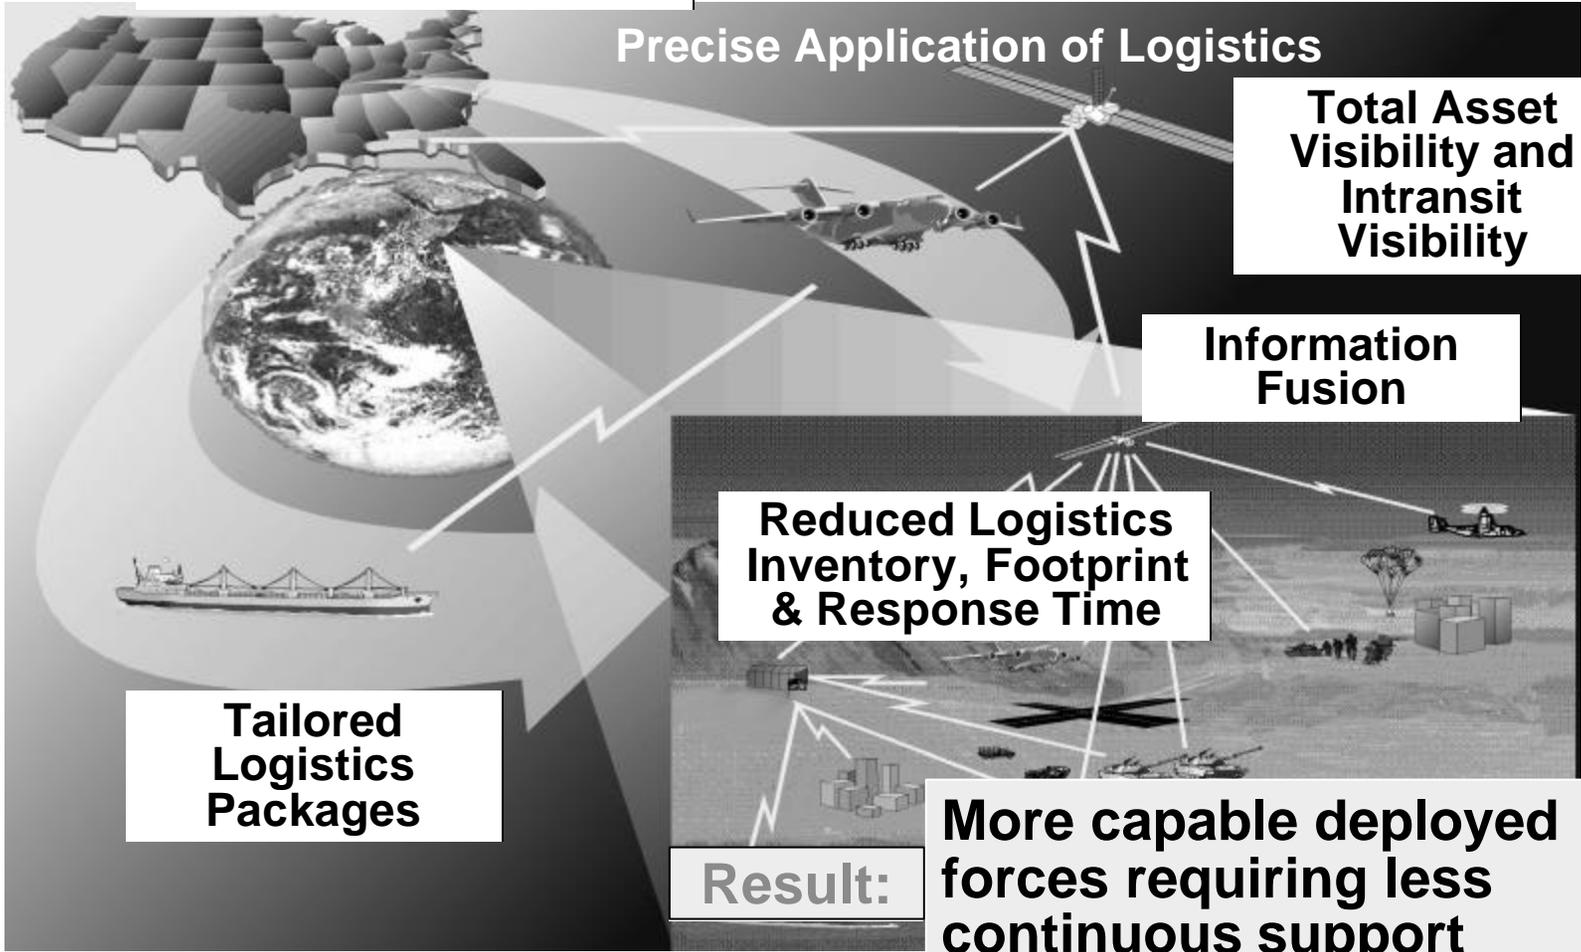

Information Fusion

Reduced Logistics Inventory, Footprint & Response Time

Tailored Logistics Packages

Result:

More capable deployed forces requiring less continuous support

Force Health Protection

A unified and comprehensive strategy that aggressively promotes a healthy and fit force and provides full protection from all potential health hazards throughout the deployment process. It's major ingredients include healthy and fit force promotion, casualty and injury prevention, and casualty care and management.

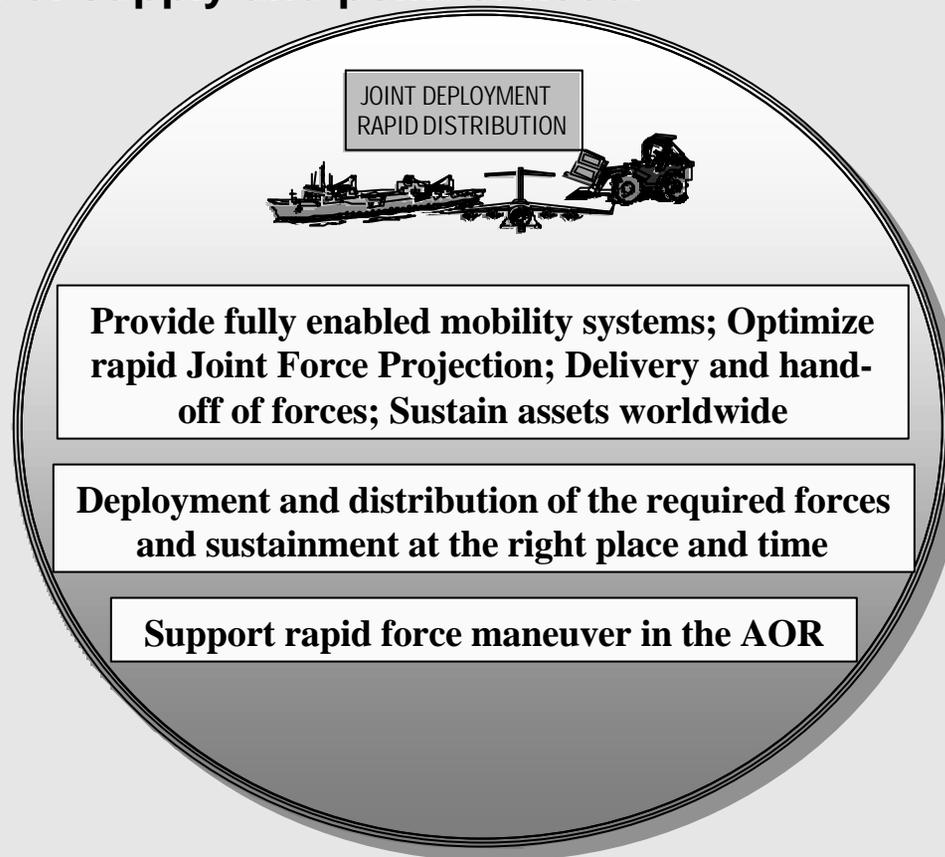

Protect forces across full spectrum

Tailor units to provide essential care in theater and enhance care during evacuation to definitive care

Joint Deployment and Rapid Distribution

The process of moving multi-Service forces to an operational area coupled with the accelerated delivery of logistics resources through improved transportation and information networks providing the warfighter with vastly improved visibility and accessibility of assets from sources of supply and point of need.

Joint Theater Logistics Management

The management process which provides the CINC the ability to synchronize, prioritize, direct, integrate, and coordinate common-user and cross-Service logistics functions necessary to accomplish the joint theater mission. By optimizing resources, it facilitates support to the warfighter while achieving economies and reducing the logistics footprint.

Agile Infrastructure

The right-sizing of the logistics footprint through reductions in logistics forces, facilities, equipment and supplies. These reductions will be enabled through significant enhancements to joint logistics policies, structures, and processes in inventory management, supply chain integration, distribution, prepositioning of materiel, engineering, maintenance, infrastructure and reduction in logistics requirements.

Provide effective, efficient and responsive infrastructure and logistics support to meet CINC/Warfighter operational requirements

Provide effective, efficient and responsive tailored engineer support to meet CINC/Warfighter operational requirements

Multinational Logistics

Mutual logistics support relationships between the United States and Allied Coalition partners.

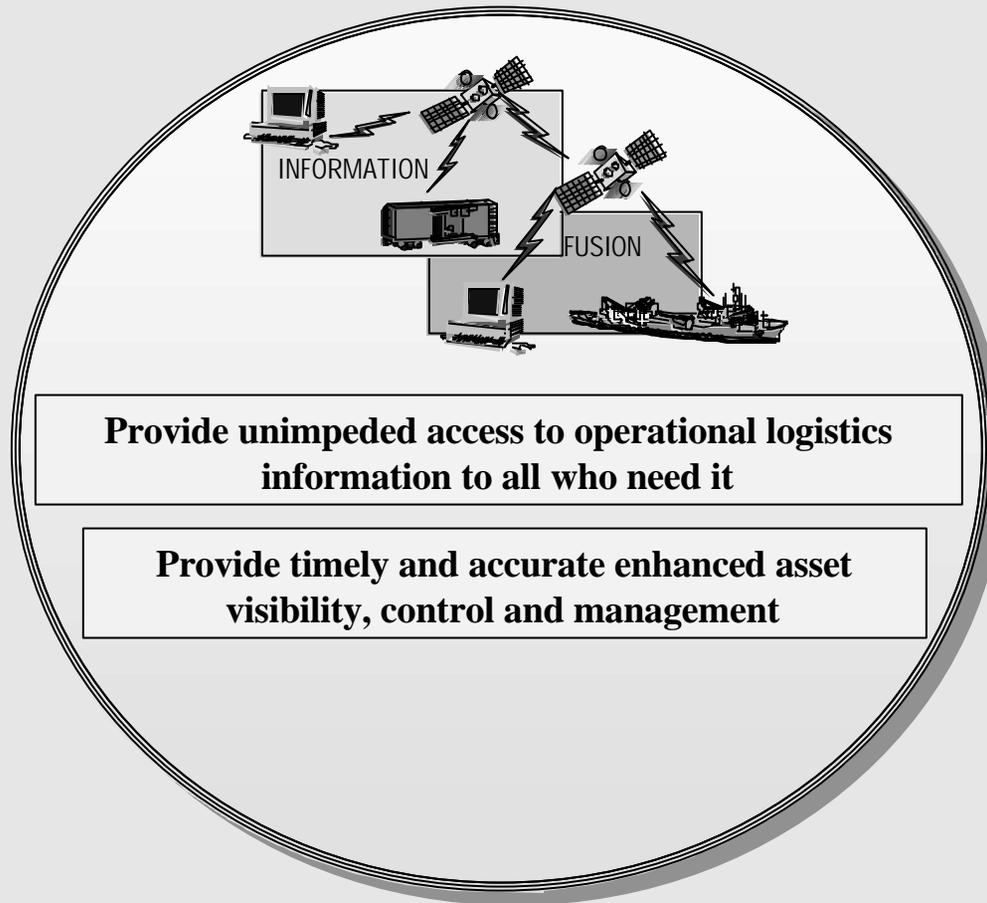

MULTINATIONAL
LOGISTICS

**Optimize logistics operations across and
between all echelons, coalitions, and host
nations**

Information Fusion

The timely and accurate access and integration of logistics data across units and combat support agencies throughout the world providing reliable asset visibility and access to logistics resources in support of the warfight.

Where We Are Going: Logistics Transformation

Real-Time Situational Awareness
